KLA-TENCOR CORPORATION

Notes to Condensed Consolidated Financial Statements

(Unaudited)

NOTE 1 BASIS OF PRESENTATION

Basis of Presentation. The condensed consolidated financial statements have been prepared by KLA-Tencor Corporation (KLA-Tencor or the Company) pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the unaudited interim financial statements reflect all adjustments (consisting only of normal, recurring adjustments) necessary for a fair statement of the financial position, results of operations and cash flows for the periods indicated. These financial statements and notes, however, should be read in conjunction with Item 8, Financial Statements and Supplementary Data included in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2008, filed with the SEC on August 7, 2008.

The condensed consolidated financial statements include the accounts of KLA-Tencor and its majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated. The Company has included the results of operations of acquired companies from the date of acquisition.

The results of operations for the three and six months ended December 31, 2008 are not necessarily indicative of the results that may be expected for any other interim period or for the full fiscal year ending June 30, 2009.

Certain reclassifications have been made to prior year financial statements to conform to the current year presentation. Starting in the first quarter of fiscal 2009, interest expense was presented as a separate line item in our condensed consolidated statements of operations (previously reported as a component of interest income and other, net). Cash flows from our trading securities were reclassified from operating to investing activities in our condensed consolidated statements of cash flows, and purchases and proceeds from sale of trading securities are presented separately (previously reported on a net basis) based on our analysis of the provisions of Statement of Financial Accounting Standards (SFAS) No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. Starting in the second quarter of fiscal 2009, goodwill and intangibles impairment is now presented as a separate line item in our condensed consolidated statements of operations (previously reported as a component of the respective operating expenses). These reclassifications had no effect on our consolidated operating results or our change in cash and cash equivalents, as previously reported.

Management Estimates. The preparation of the condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Recent Accounting Pronouncements. On August 27, 2008, the SEC announced that they will issue for comment a proposed roadmap regarding the potential use by U.S. issuers of financial statements prepared in accordance with International Financial Reporting Standards (IFRS). IFRS is a comprehensive series of accounting standards published by the International Accounting Standards Board. Under the proposed roadmap, the Company could be required in fiscal 2014 to prepare financial statements in accordance with IFRS, and the SEC will make a determination in 2011 regarding the mandatory adoption of IFRS. The Company is currently assessing the impact that this potential change would have on its consolidated financial statements, and the Company will continue to monitor the development of the potential implementation of IFRS.

In October 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) SFAS No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active*. FSP SFAS No. 157-3 clarifies the application of SFAS No. 157, which the Company adopted as of July 1, 2008, in situations where the market is not active. The Company has considered the guidance provided by FSP SFAS No. 157-3 in its determination of estimated fair values as of December 31, 2008, and the impact was not material.

In December 2008, FASB issued FSP SFAS No. 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*. FSP SFAS No. 132(R)-1 amends SFAS No. 132(R) to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The FSP requires disclosures surrounding how investment allocation decisions are made, including the factors that are pertinent to an understanding of investment policies and strategies. The disclosure requirement under this FSP is effective for the Company's fiscal year beginning July 1, 2010.

NOTE 2 FAIR VALUE MEASUREMENTS

Effective July 1, 2008, the Company adopted the fair value measurement and disclosure provisions of SFAS No. 157, *Fair Value Measurements*, which establishes specific criteria for the fair value measurements of financial and nonfinancial assets and liabilities that are already subject to fair value measurements under current accounting rules. SFAS No. 157 also requires expanded

Table of Contents

disclosures related to fair value measurements. In February 2008, the FASB approved FSP SFAS No. 157-2, *Effective Date of FASB Statement No. 157*, which allows companies to elect a one-year delay in applying SFAS No. 157 to certain fair value measurements, primarily related to nonfinancial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The Company elected the delayed adoption date for the portions of SFAS No. 157 impacted by FSP SFAS No. 157-2. The partial adoption of SFAS No. 157 was prospective and did not have a significant effect on the Company's Condensed Consolidated Financial Statements. The Company is currently evaluating the impact of applying the deferred portion of SFAS No. 157 to the nonrecurring fair value measurements of its nonfinancial assets and liabilities. In accordance with FSP SFAS No. 157-2, the fair value measurements for nonfinancial assets and liabilities will be adopted effective for fiscal years beginning after November 15, 2008.

Concurrently with the adoption of SFAS No. 157, the Company adopted SFAS No. 159, *Establishing the Fair Value Option for Financial Assets and Liabilities*, which permits entities to elect, at specified election dates, to measure eligible financial instruments at fair value. As of December 31, 2008, the Company did not elect the fair value option under SFAS No. 159 for any financial assets and liabilities that were not previously measured at fair value with the exception of the Put Option related to the auction rate securities repurchase agreement with UBS AG referenced in Note 4, *Marketable Securities*.

Fair Value Hierarchy. SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under SFAS No. 157 are described below:

- Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that the entity has the ability to access.
- Level 2 Valuations based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.
- Level 3 Valuations based on inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Most of the Company's financial instruments are classified within Level 1 or Level 2 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. The types of instruments valued based on quoted market prices in active markets include money market funds and U.S. Treasury securities. Such instruments are generally classified within Level 1 of the fair value hierarchy.

The types of instruments valued based on other observable inputs include U.S. agency securities, commercial paper, U.S. corporate bonds and municipal obligations. Such instruments are generally classified within Level 2 of the fair value hierarchy.

The principal market in which we execute our foreign currency contracts is the institutional market in an over-the-counter environment with a relatively high level of price transparency. The market participants usually are large commercial banks. Our foreign currency contracts' valuation inputs are based on quoted prices and quoted pricing intervals from public data sources and do not involve management judgment. These contracts are typically classified within Level 2 of the fair value hierarchy.

The types of instruments valued based on unobservable inputs include the auction rate securities held by the Company. Such instruments are generally classified within Level 3 of the fair value hierarchy. The Company estimated the fair value of these auction rate securities using a discounted cash flow model incorporating assumptions that market participants would use in their estimates of fair value. Some of these assumptions include estimates for interest rates, timing and amount of cash flows and expected holding periods of the auction rate securities.

Financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2008 were as follows:

(in thousands)	Total	Quoted Prices in Active Markets	Significant Other Observable Inputs	Significant Unobservable Inputs (Level 3)
----------------	-------	---------------------------------------	---	---

Edgar Filing: KLA TENCOR CORP - Form 10-Q

Auction rate securities	\$ 34,463	\$ 42,147
Total long-term marketable securities	\$ 34,463	\$ 42,147

The Company's investment portfolio includes auction rate securities, which are investments with contractual maturities generally between 20 to 30 years. They are usually found in the form of municipal bonds, preferred stock, a pool of student loans, or collateralized debt obligations whose interest rates are reset. The reset typically occurs every seven to forty-nine days, through an auction process. At the end of each reset period, investors can sell or continue to hold the securities at par. The auction rate securities held by the Company are backed by student loans and are collateralized, insured and guaranteed by the United States Federal Department of Education. In addition, all auction rate securities held by the Company are rated by the major independent rating agencies as either AAA or Aaa. In February 2008, auctions failed for approximately \$48.2 million in par value of municipal auction rate securities that the Company held because sell orders exceeded buy orders. These failures are not believed to be a credit issue, but rather caused by a lack of liquidity. The funds associated with these failed auctions may not be accessible until the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process, or the security matures. As a result, the Company has classified these securities with failed auctions as long-term assets in its condensed consolidated balance sheet. Prior to the three months ended December 31, 2008, a total of \$5.6 million of the auction rate securities with a net book value of \$5.4 million were called at par by the issuer; therefore no losses were recognized on these securities. During the three months ended December 31, 2008, an additional \$1.6 million of the auction rate securities with a net book value of \$1.3 million was called at par by the issuer; therefore no losses were recognized on these securities during the three months ended December 31, 2008. The fair value of the auction rate securities at December 31, 2008 was \$34.5 million.

By letter dated August 8, 2008, the Company received notification from UBS AG (UBS), issued in connection with a settlement entered into between UBS and certain regulatory agencies, offering to repurchase all of the Company's auction rate security holdings at par value. The Company formally accepted the settlement offer and entered into a repurchase agreement (Agreement) with UBS on November 11, 2008 (Acceptance Date). By accepting the Agreement, the Company (1) received the right (Put Option) to sell its auction rate securities at par value to UBS between June 30, 2010 and July 2, 2012 and (2) gave UBS the right to purchase the auction rate securities from the Company any time after the Acceptance Date as long as the Company receives the par value.

The Company expects to sell the auction rate securities under the Put Option. However, if the Put Option is not exercised before July 2, 2012, it will expire and UBS will have no further rights or obligation to buy the auction rate securities.

UBS's obligations under the Put Option are not secured by its assets and do not require UBS to obtain any financing to support its performance obligations under the Put Option. UBS has disclaimed any assurance that it will have sufficient financial resources to satisfy its obligations under the Put Option.

The Agreement covers \$41.2 million par value (fair value of \$34.5 million) of the auction rate securities held by the Company as of December 31, 2008. The Company has accounted for the Put Option as a freestanding financial instrument and elected to record the value under the fair value option of SFAS No. 159. As a result, \$6.4 million was recorded as a credit to interest income and other, net for the fair value of the Put Option. Simultaneously, the Company made an election pursuant to SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, to transfer these auction rate securities from available-for-sale to trading securities. The transfer to trading securities reflects the Company's intent to exercise the Put Option during the period June 30, 2010 to July 2,

Edgar Filing: KLA TENCOR CORP - Form 10-Q

2012. Prior to entering into the Agreement, the Company's intent was to hold the auction rate securities until the market recovered. At the time of transfer, the unrealized loss on the auction rate securities was \$1.3

Table of Contents

million. Prior to the transfer, this unrealized loss was included in accumulated other comprehensive income (loss). Upon transfer of the auction rate securities to trading securities, the Company immediately recognized an unrealized loss of \$1.3 million, included in interest income and other, net, for the amount of the unrealized loss not previously recognized in earnings. Subsequently, the Company recognized an additional decline in fair value of \$5.4 million for a total unrealized loss of \$6.7 million, included in interest income and other, net, in the condensed consolidated statements of operations for the three months ended December 31, 2008. The Company expects that the future changes in the fair value of the Put Option will be largely offset by the fair value movements in the auction rate securities. The Company estimated the fair value of the auction rate securities using a discounted cash flow model incorporating assumptions that market participants would use in their estimates of fair value. Some of these assumptions include estimates for interest rates, timing and amount of cash flows and expected holding periods of the auction rate securities. The Company estimated the fair value of the Put Option using the expected value that the Company will receive from UBS which was calculated as the difference between the anticipated recognized losses and par value of the auction rate securities as of the option exercise date. This value was discounted by using UBS's credit default swap rate to account for the credit considerations of the counterparty risk. The Company will reassess the fair values in future reporting periods based on several factors, including continued failure of auctions, failure of investments to be redeemed, deterioration of credit ratings of investments, market risk and other factors. Based on the Company's expected operating cash flows and other sources of cash, it does not believe that any reduction in liquidity of its auction rate securities will have a material impact on its overall ability to meet its liquidity needs.

NOTE 5 BUSINESS COMBINATIONS

The Company accounts for business combinations using the purchase method of accounting. Consideration includes the cash paid and the value of options assumed, if any, less any cash acquired, and excludes contingent employee compensation payable in cash.

During the three months ended September 30, 2008, the Company completed its acquisition of the Microelectronic Inspection Equipment business unit (MIE business unit) of Vistec Semiconductor Systems for net cash consideration of approximately \$139.3 million. The acquired MIE business unit is a provider of mask registration measurement tools, scanning electron microscopy (SEM) based tools for mask critical dimension measurement and macro defect inspection systems.

The following table represents preliminary purchase price allocation and summarizes the aggregate estimated fair values of the net assets acquired on the closing date of the acquisition of the MIE business unit:

(in thousands)	Preliminary Purchase Price Allocation
Cash	\$ 14,219
Current assets	61,034
Intangibles:	
Existing technology	39,800
Patents	18,200
Trade name/Trademarks	4,800
Customer relationships	19,300
In-process R&D (IPR&D)	8,600
Backlog	6,750
Other intangible assets	9,950
Noncurrent assets	2,749
Goodwill	39,399
Liabilities assumed	(71,299)
	\$ 153,502
Cash consideration paid	\$ 153,078
Cash consideration accrued(1)	\$ 424

(1) The \$0.4 million of accrued cash consideration represents payments to be made for funding of remaining estimated obligations under the stock purchase agreement. This amount is expected to be settled and paid in the three months ending March 31, 2009. Goodwill represents the excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired. The \$39.4 million of goodwill is assigned to the defect inspection reporting unit, which is not expected to be deductible for tax purposes. This acquisition provides the Company with a line of mask registration measurement tools to complement the Company's

Edgar Filing: KLA TENCOR CORP - Form 10-Q

existing mask inspection products. In addition, through the acquisition the Company has acquired a provider of SEM-based tools for mask critical dimension measurement. Other technologies of the MIE business unit acquired by the Company in the transaction include macro defect inspection systems, overlay measurement systems for microelectromechanical systems (MEMS) applications and software packages for defect classification and data analysis.

Table of Contents

The results of operations of the acquired MIE business unit are included in the accompanying Condensed Consolidated Statement of Operations from the closing date of the acquisition on September 30, 2008. Pro forma earnings information has not been presented because the effect of the acquisition of the MIE business unit is not material.

The fair value of the purchased IPR&D and identified intangibles was determined using the income approach, which discounts expected future cash flows from projects to their net present value. Each project was analyzed to determine the technological innovations included; the utilization of core technology; the complexity, cost and time to complete development; any alternative future use or current technological feasibility; and the stage of completion. Future cash flows were estimated, taking into account the expected life cycles of the products and the underlying technology, relevant market sizes and industry trends. The Company determined a discount rate for each project based on the relative risks inherent in the project's development horizon, the estimated costs of development, and the level of technological change in the project and the industry, among other factors.

The Company expensed IPR&D of \$8.6 million upon the completion of the acquisition of the MIE business unit in the three months ended September 30, 2008, in connection with acquired intellectual property for which technological feasibility has not been established and no future alternative uses exist.

During the three months ended December 31, 2007, the Company acquired a development stage company for \$4.0 million. The acquisition was accounted for as a purchase of assets primarily consisting of IPR&D for which technological feasibility had not been established and no future alternative uses exist. Upon the completion of the acquisition the Company expensed IPR&D of \$3.4 million. The fair value of the purchased IPR&D was determined using the income approach, which discounts expected future cash flows from projects to their net present value. Each project was analyzed to determine the technological innovations included; the utilization of core technology; the complexity, cost and time to complete development; any alternative future use or current technological feasibility; and the stage of completion. Future cash flows were estimated, taking into account the expected life cycles of the products and the underlying technology, relevant market sizes and industry trends. The Company determined a discount rate for each project based on the relative risks inherent in the project's development horizon, the estimated costs of development, and the level of technological change in the project and the industry, among other factors. The Company acquired intangible assets of \$0.5 million, consisting of patents, valued using the income approach.

NOTE 6 GOODWILL AND PURCHASED INTANGIBLE ASSETS**Goodwill**

The following table presents goodwill balances and the movements during the six months ended December 31, 2008:

(In thousands)	Amount
As of June 30, 2008	\$ 601,882
Acquisition	35,710
Adjustments	(23,434)
Impairment	(276,586)
 As of December 31, 2008	 \$ 337,572

Goodwill represents the excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired in each business combination. The carrying value of goodwill was allocated to KLA-Tencor's reporting units pursuant to SFAS No. 142, *Goodwill and Other Intangible Assets*. In accordance with SFAS No. 142, the Company completed its annual evaluation of the goodwill by reporting unit for the three months ended December 31, 2008. As a result of the global economic downturn, reductions to the Company's revenue, operating income, and cash flow forecasts, and a significant reduction in the Company's market capitalization, the Company determined that the goodwill related to its Metrology reporting unit was impaired. As a result, the Company recorded an impairment charge of \$272.1 million, which represented the entire goodwill amount related to the Metrology reporting unit, during the three months ended December 31, 2008, which reduced the Company's goodwill carrying value to \$337.6 million as of December 31, 2008. The Company's assessment of goodwill impairment indicated that the fair values of the Company's Defect Inspection, Service, and Other reporting units exceeded their estimated carrying values and therefore goodwill in those reporting units was not impaired.

Goodwill impairment testing is a two-step process. Step 1 involves comparing the fair value of the Company's reporting units to their carrying amount. If the fair value of the reporting unit is greater than its carrying amount, there is no impairment. If the reporting unit's carrying amount is greater than the fair value, the second step must be completed to measure the amount of impairment, if any. Step 2 calculates the implied fair value of goodwill by deducting the fair value of all tangible and intangible assets, excluding goodwill, of the reporting unit from the fair value of the reporting unit as determined in Step 1. The implied fair value of goodwill

Edgar Filing: KLA TENCOR CORP - Form 10-Q

determined in this step is compared to the carrying value of goodwill. If the implied fair value of goodwill is less than the carrying value of goodwill, an impairment loss is recognized equal to the difference. The result of the Company's analysis indicated that there would be no remaining implied value attributable to the Metrology reporting unit. Accordingly, the Company wrote off all \$272.1 million of goodwill associated with its Metrology reporting unit during the three months ended December 31, 2008.

Table of Contents

determined in this step is compared to the carrying value of goodwill. If the implied fair value of goodwill is less than the carrying value of goodwill, an impairment loss is recognized equal to the difference. The result of the Company's analysis indicated that there would be no remaining implied value attributable to the Metrology reporting unit. Accordingly, the Company wrote off all \$272.1 million of goodwill associated with its Metrology reporting unit during the three months ended December 31, 2008.

Fair value was determined by using a weighted combination of two market-based approaches and an income approach, as this combination was deemed to be the most indicative of the Company's fair value in an orderly transaction between market participants and is consistent in principle with the methodology used for goodwill evaluation in the prior year. Under the market-based approaches, the Company utilized information regarding the Company as well as publicly available industry information to determine earnings multiples and sales multiples that are used to value the Company's reporting units. The Company assigned a higher weighting to the discounted cash flow due to the fact that current market conditions are depressed (as compared to the goodwill evaluation performed in fiscal year 2008, when the Company assigned equal weighting for each of the three approaches). Under the income approach, the Company determined fair value based on estimated future cash flows of each reporting unit, discounted by an estimated weighted-average cost of capital, which reflects the overall level of inherent risk of a reporting unit and the rate of return an outside investor would expect to earn. Determining the fair value of a reporting unit is judgmental in nature and requires the use of significant estimates and assumptions, including revenue growth rates and operating margins, discount rates and future market conditions, among others.

Solely for purposes of establishing inputs for the fair value calculations described above related to goodwill impairment testing, the Company made the following assumptions. The Company assumed that the current economic downturn would continue through fiscal year 2010, followed by a recovery period in fiscal years 2011 and 2012, and long-term industry growth past fiscal year 2012. In addition, the Company applied gross margin assumptions consistent with the Company's historical trends at various revenue levels and used a 5% growth factor to calculate the terminal value of its reporting units, which is consistent with the rate used in the prior year. The Company used a 13% discount rate to calculate the terminal value of its reporting units, which is slightly lower than the 14% discount rate used in the prior year, primarily due to the fact that in April 2008 the Company issued \$750 million of unsecured long-term debt due in 2018, which reduced its weighted average cost of capital. The sum of the fair values of the reporting units was reconciled to the Company's current market capitalization (based upon the Company's stock price) plus an estimated control premium.

Given the current economic environment and the uncertainties regarding the impact on the Company's business, there can be no assurance that the Company's estimates and assumptions regarding the duration of the ongoing economic downturn, or the period or strength of recovery, made for purposes of the Company's goodwill impairment testing during the three months ended December 31, 2008 will prove to be accurate predictions of the future. If the Company's assumptions regarding forecasted revenue or margin growth rates of certain reporting units are not achieved, the Company may be required to record additional goodwill impairment charges in future periods, whether in connection with the Company's next annual impairment testing in the second quarter of fiscal year 2010 or prior to that, if any such change constitutes a triggering event outside of the quarter from when the annual goodwill impairment test is performed. It is not possible at this time to determine if any such future impairment charge would result or, if it does, whether such charge would be material.

Adjustments to goodwill during the six months ended December 31, 2008 resulted primarily from revisions to purchase price allocations as well as foreign currency translation adjustments related to ICOS Vision Systems Corporation NV and the MIE business unit.

Purchased Intangible Assets

The components of purchased intangible assets as of December 31, 2008 and June 30, 2008 were as follows:

(in thousands)	Range of Useful Lives	As of December 31, 2008			As of June 30, 2008		
		Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Existing technology	4-7 years	\$ 125,957	\$ 46,821	\$ 79,136	\$ 201,606	\$ 55,813	\$ 145,793
Patents	6-13 years	57,163	24,647	32,516	71,749	18,615	53,134
Trade name / Trademark	4-10 years	19,494	8,275	11,219	33,929	5,918	28,011
Customer relationships	6-7 years	53,919	18,704	35,215	80,600	12,707	67,893
Other	0-1 year	16,621	12,632	3,989	14,822	11,875	2,947
Total		\$ 273,154	\$ 111,079	\$ 162,075	\$ 402,706	\$ 104,928	\$ 297,778

Edgar Filing: KLA TENCOR CORP - Form 10-Q

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. During the fiscal year ended June 30, 2008, the Company identified a certain business unit as held for sale and based on the estimated selling price of that business unit, the Company determined that the carrying amount of certain related intangible assets,

Table of Contents

primarily existing technology, patents and customer relationship, exceeded fair value by \$6.5 million. As a result, an impairment charge of \$6.5 million was recorded during the fiscal year ended June 30, 2008. During the three months ended September 30, 2008, based on the revised estimated selling price of that business unit, the Company determined that the carrying amount of certain related net assets further exceeded fair value by \$11.9 million. As a result, an additional impairment charge of \$11.9 million, of which \$4.5 million relates to goodwill impairment and \$7.4 million relates to intangible assets impairment, was recorded during the three months ended September 30, 2008. Of the \$7.4 million of intangible assets impairment, \$5.4 million was recorded to costs of revenues and \$2.0 million to selling, general and administrative expense. There were no changes to the valuation of the business unit during the three months ended December 31, 2008. The Company is not able to predict when the business unit will be sold.

During the quarter ended December 31, 2008, the economic conditions that affect the Company's industry have deteriorated, which has led our customers to scale back their production operations and reduce their capital expenditures. Industry analysts expect demand for semiconductor capital equipment to continue to remain weak until macroeconomic conditions improve. In addition, the Company experienced a significant decline in its stock price, resulting in a significant reduction in the Company's market capitalization. Accordingly, the Company performed an assessment of its purchased intangible assets to test for recoverability in accordance with SFAS No. 144. The assessment of recoverability is based on management's estimates. Based on the assessment, undiscounted projected future operating cash flows for certain long-lived asset groups did not exceed the net book value, indicating that a permanent impairment had occurred. The fair value was determined using the income approach which is a present value technique used to measure the fair value of future cash flows produced by each asset group. The Company estimated the future cash flows over the weighted average of the remaining useful lives of its intangible assets, which range from 1 to 6 years, using a 13% discount rate. Based on the assessment, the Company recorded an intangible asset impairment charge of \$162.8 million during the three months ended December 31, 2008, of which \$73.1 million related to existing technology, \$26.3 million to patents, \$38.1 million to customer relationships, \$16.6 million to trademarks and \$8.7 million to other intangible assets.

For the three months ended December 31, 2008 and 2007, amortization expense for purchased intangible assets was \$16.1 million and \$8.5 million, respectively. For the six months ended December 31, 2008 and 2007, amortization expense for other intangible assets was \$41.0 million and \$16.9 million, respectively. Based on the intangible assets recorded as of December 31, 2008, and assuming no subsequent additions to, or impairment of the underlying assets, the remaining estimated amortization expense is expected to be as follows:

Fiscal year ending June 30:	Amortization (in thousands)
2009 (remaining 6 months)	\$ 19,415
2010	32,251
2011	31,245
2012	28,392
2013	19,035
Thereafter	31,737
Total	\$ 162,075

NOTE 7 LONG-TERM DEBT

In April 2008, the Company issued \$750 million aggregate principal amount of 6.90% senior, unsecured long-term debt due in 2018 with an effective interest rate of 7.00%. The discount on the debt amounted to \$5.4 million and is being amortized over the life of the debt using the straight-line method as opposed to the interest method due to immateriality. Interest is payable semi-annually on November 1 and May 1. The debt indenture includes covenants that limit the Company's ability to grant liens on its facilities and to enter into sale and leaseback transactions, subject to significant allowances under which certain sale and leaseback transactions are not restricted. The Company was in compliance with all of its covenants as at December 31, 2008.

In certain circumstances involving a change of control followed by a downgrade of the rating of the Company's senior notes, the Company will be required to make an offer to repurchase the senior notes at a purchase price equal to 101% of the aggregate principal amount of the notes repurchased, plus accrued and unpaid interest. The Company's ability to repurchase the senior notes in such event may be limited by law, by the indenture associated with the senior notes, by the terms of other agreements to which the Company may be party at such time. If the Company fails to repurchase the senior notes as required by the indenture, it would constitute an event of default under the indenture governing the senior notes which, in turn, may also constitute an event of default under other obligations.

Table of Contents**NOTE 8 STOCK-BASED COMPENSATION****Equity Incentive Program**

Under the Company's current equity incentive program, the Company issues equity awards under its 2004 Equity Incentive Plan (the "2004 Plan"), under which officers, employees, non-employee directors and consultants may be granted options to purchase shares of the Company's stock, restricted stock units and other types of equity awards.

Except for options granted to non-employee directors as part of their regular compensation package for service through the end of the first quarter of fiscal year 2008, the Company has granted only restricted stock units under its equity incentive program since August 1, 2006. For the preceding several years until June 30, 2006, stock options (except for the retroactively priced options which were granted primarily prior to the fiscal year ended June 30, 2002) were generally granted at the market price of the Company's common stock on the date of grant, with a vesting period of five years and an exercise period not to exceed seven years (ten years for options granted prior to July 1, 2005) from the date of issuance. Restricted stock units may be granted with varying criteria such as service-based or performance-based vesting. Substantially all of the Company's employees that meet established performance goals and qualify as key employees participate in its main equity incentive plan.

On October 18, 2004, the Company's stockholders approved the 2004 Equity Incentive Plan (the "2004 Plan") which provides for the grant of options to purchase shares of its common stock, stock appreciation rights, restricted stock units, performance shares, performance units and deferred stock units to its employees, consultants and members of its Board of Directors. The 2004 Plan permits the issuance of up to 21.0 million shares of common stock, of which 4.7 million shares were available for grant as of December 31, 2008. Any 2004 Plan awards of restricted stock units, performance shares, performance units or deferred stock units with a per share or unit purchase price lower than 100% of fair market value on the grant date are counted against the total number of shares issuable under the 2004 Plan as 1.8 shares for every one share subject thereto. Total options outstanding under all plans as of December 31, 2008 were 14.7 million shares with a weighted-average remaining contractual term of 3.9 years. During the six months ended December 31, 2008, approximately 0.3 million restricted stock units were granted to senior management with performance-based and service-based vesting criteria.

The following table summarizes the combined activity under the equity incentive plans for the indicated period:

(in thousands except for weighted-average exercise price)	Available For Grant	Options Outstanding	Weighted- Average Exercise Price
Balances at June 30, 2008	9,245	16,012	\$ 42.43
Plan shares expired	(467)		
Restricted stock units granted(1)	(3,958)		
Restricted stock units canceled(1)	383		
Restricted stock units traded for taxes	342		
Options canceled/expired/forfeited	678	(678)	\$ 43.97
Options exercised		(610)	\$ 16.04
Balances at December 31, 2008	6,223	14,724	\$ 43.46

- (1) Any 2004 Plan awards of restricted stock units, performance shares, performance units or deferred stock units with a per share or unit purchase price lower than 100% of fair market value on the grant date are counted against the total number of shares issuable under the 2004 Plan as 1.8 shares for every one share subject thereto.

The Company accounts for its stock-based awards exchanged for employee services under the provisions of SFAS No. 123(R). Accordingly, the fair value of stock-based awards is measured at grant date and is recognized as expense over the employee's requisite service period. The fair value is determined using a Black-Scholes valuation model for stock options and for purchase rights under the Company's Employee Stock Purchase Plan and using the closing price of the Company's common stock on the grant date for restricted stock units.

The following table shows pre-tax stock-based compensation expense for the indicated periods:

Edgar Filing: KLA TENCOR CORP - Form 10-Q

(in thousands)	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Stock-based compensation expense:				
Costs of revenues	\$ 4,679	\$ 4,700	\$ 10,135	\$ 10,953
Engineering, research and development	6,981	7,109	16,953	15,701
Selling, general and administrative	10,643	11,443	29,597	24,681
Total stock-based compensation	\$ 22,303	\$ 23,252	\$ 56,685	\$ 51,335

Table of Contents**Stock Options**

Except for options granted to non-employee directors as part of their regular compensation package for service through the end of the first quarter of fiscal year 2008, the Company has granted only restricted stock units under its equity incentive program since July 1, 2006. Therefore, no comparative information is presented in the table below for the three and six months ended December 31, 2008. The Company estimates the fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of SFAS No. 123(R) and SEC Staff Accounting Bulletin (SAB) No. 107. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option valuation model and the straight-line attribution approach with the following weighted-average assumptions:

	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Stock option plan:				
Expected stock price volatility	(*)	36%	(*)	34%
Risk free interest rate	(*)	4.0%	(*)	4.4%
Dividend yield	(*)	1.1%	(*)	1.0%
Expected life of options (in years)	(*)	4.7	(*)	4.7

(*) The Company did not issue any stock options during the three and six months ended December 31, 2008.

SFAS No. 123(R) requires the use of option pricing models that were not developed for use in valuing employee stock options. The Black-Scholes option-pricing model requires the input of highly subjective assumptions, including the option's expected life and the price volatility of the underlying stock. The expected stock price volatility assumption was based on market-based implied volatility from traded options on the Company's stock.

The following table shows the grant-date fair value after estimated forfeitures, weighted-average grant date fair value per share, total intrinsic value of options exercised, total cash received from employees as a result of employee stock option exercises, and tax benefits realized in connection with these exercises of the stock options for the indicated periods:

(in thousands, except for weighted-average grant date fair value per share)	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Grant-date fair value after estimated forfeitures	\$	\$ 208	\$	\$ 1,947
Weighted-average grant date fair value per share	\$	\$ 17.49	\$	\$ 17.95
Total intrinsic value of options exercised	1,482	4,178	10,631	54,903
Total cash received from employees as a result of employee stock option exercises	3,618	10,494	9,585	107,055
Tax benefits realized by Company in connection with these exercises	798	1,455	4,014	18,950

As of December 31, 2008, 12.7 million options were exercisable with a weighted-average exercise price of \$43.30 and weighted-average remaining contractual term of 3.8 years. The aggregate intrinsic value for the options exercisable as of December 31, 2008 was insignificant. As of December 31, 2008, the unrecognized stock-based compensation balance related to stock options was \$29.9 million and will be recognized over an estimated weighted-average amortization period of 1.6 years.

The Company settles employee stock option exercises with newly issued common shares, except in certain tax jurisdictions where settling such exercises with treasury shares provides the Company or one of its subsidiaries with a tax benefit.

The following table shows stock-based compensation capitalized as inventory and deferred system profit as of December 31, 2008 and June 30, 2008:

(in thousands)	December 31, 2008	June 30, 2008
Inventory	\$ 6,907	\$ 6,526
Deferred system profit	\$	\$ 829

Table of Contents**Restricted Stock Units**

The following table shows the applicable number of restricted stock units and weighted-average grant date fair value for restricted stock units granted, vested and released, and forfeited during the six months ended December 31, 2008 and restricted stock units outstanding as of December 31, 2008 and June 30, 2008:

Restricted Stock Units	Shares (in thousands)	Weighted-Average Grant Date Fair Value
Outstanding restricted stock units as of June 30, 2008	5,075	\$ 31.50
Granted	2,198	\$ 14.66
Vested and released	(1,081)	\$ 32.07
Forfeited	(212)	\$ 28.69
Outstanding restricted stock units as of December 31, 2008	5,980	\$ 25.20

Since the beginning of the fiscal year ended June 30, 2007, the restricted stock units granted by the Company generally vest in two equal installments on the second and fourth anniversaries of the date of grant. Prior to the fiscal year ended June 30, 2007, the restricted stock units granted by the Company generally vested in two equal installments over four or five years from the anniversary date of the grant. The value of the restricted stock units is based on the closing market price of the Company's common stock on the date of award. The restricted stock units have been awarded under the Company's 2004 Plan, and each unit will entitle the recipient to one share of common stock when the applicable vesting requirements for that unit are satisfied. However, for each share actually issued under the awarded units, the share reserve under the 2004 Plan will be reduced by 1.8 shares, as provided under the terms of the 2004 Plan.

As of December 31, 2008, the unrecognized stock-based compensation balance related to restricted stock units was \$102.3 million and will be recognized over an estimated weighted-average amortization period of 2.8 years.

In connection with the vested and released restricted stock units, the Company realized tax benefits of \$0.8 million and \$12.5 million for the three and six months ended December 31, 2008, respectively.

Employee Stock Purchase Plan

KLA-Tencor's Employee Stock Purchase Plan (ESPP) provides that eligible employees may contribute up to 10% of their eligible earnings toward the semi-annual purchase of KLA-Tencor's common stock. The ESPP is qualified under Section 423 of the Internal Revenue Code. The employee's purchase price is derived from a formula based on the fair market value of the common stock at the time of enrollment into the offering period versus the fair market value on the date of purchase. Offering periods are generally two years in length. During the quarter ended December 31, 2008, the Company's Board of Directors, as part of the Company's ongoing efforts to reduce operating expenses, approved amendments to the ESPP so as to, among other things, reduce each offering period under the ESPP (and therefore the length of the look-back period) from 24 months to 6 months. This change became effective January 1, 2009, such that each offering period beginning on or after such date will have a duration of six months, and the purchase price with respect to each such offering period will be 85% of the lesser of (i) the fair market value of the Company's common stock at the commencement of the six-month offering period or (ii) the fair market value of the Company's common stock on the purchase date.

The Company estimates the fair value of purchase rights under the ESPP using a Black-Scholes valuation model, consistent with the provisions of SFAS No. 123(R) and SEC SAB No. 107. The fair value of each purchase right under the ESPP is estimated on the date of grant using the Black-Scholes option valuation model and the straight-line attribution approach with the following weighted-average assumptions:

	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Stock purchase plan:				
Expected stock price volatility	41%	32%	41%	35%
Risk free interest rate	1.8%	4.9%	1.8%	5.1%

Edgar Filing: KLA TENCOR CORP - Form 10-Q

Dividend yield	1.4%	0.9%	1.4%	1.2%
Expected life of options (in years)	1.3	1.3	1.3	1.3

The ESPP shares are replenished annually on the first day of each fiscal year by virtue of an evergreen provision. The provision allows for share replenishment equal to the lesser of 2.0 million shares or the number of shares which KLA-Tencor estimates that it will be required to issue under the ESPP during the forthcoming fiscal year. In the first quarter of the fiscal year ending June 30, 2009, the Company estimated that it would need to issue up to 1.0 million shares under the ESPP during fiscal year 2009 and, in accordance with the evergreen provision of the ESPP, increased the number of shares reserved under the ESPP by 1.0 million shares. As of December 31, 2008, a total of 1.0 million shares were reserved and available for issuance under the ESPP.

Table of Contents

In connection with the disqualifying dispositions of shares purchased under the ESPP, the Company realized tax benefits as the following:

(in thousands)	Three months ended		Six months ended	
	December 31, 2008	2007	December 31, 2008	2007
Tax benefits realized in connection with these exercises	\$ 70	\$ 325	\$ 296	\$ 889

IRC Section 409A Affected Options

Because virtually all holders of retroactively priced options that had been issued by the Company were not involved in or aware of the retroactive pricing, the Company took certain actions to deal with the adverse tax consequences that may have been incurred by the holders of retroactively priced options. The adverse tax consequences were that retroactively priced stock options vesting after December 31, 2004 (409A Affected Options) subject the option holder to a penalty tax under IRC Section 409A (and, as applicable, similar penalty taxes under California and other state tax laws). One such action by the Company involved offering to amend the 409A Affected Options to increase the exercise price to the market price on the actual grant date or, if lower, the market price at the time of the amendment, in exchange for cash bonus payments to the option holders that were paid in January 2008 in an amount equal to the aggregate increase in exercise prices of the amended 409A Affected Options held by such option holders. The amended options would not be subject to taxation under IRC Section 409A. The Company amended certain options during the quarters ended December 31, 2006, March 31, 2007 and December 31, 2007, and paid cash bonuses in connection with such amendments during the quarter ended March 31, 2008. During the three and six months ended December 31, 2008, the Company recorded no charges related to the amendment of the 409A Affected Options or the payment of the related cash bonuses. During the three and six months ended December 31, 2007, the Company recorded \$0.2 million related to the amendment of the 409A Affected Options or the payment of the related cash bonuses.

Executive Severance and Consulting Agreement

During August 2008, the Company announced that John H. Kispert, then the Company's President and Chief Operating Officer, would cease to be an employee of the Company effective January 1, 2009. In accordance with the terms of a Severance and Consulting Agreement entered into between the Company and Mr. Kispert dated August 28, 2008, Mr. Kispert is entitled to receive, in addition to certain cash payments and benefits, the following benefits related to his outstanding equity awards: (i) accelerated, pro-rated vesting of the unvested portion (as of the date that his employment with the Company terminates) of all of his outstanding restricted stock units, such that a percentage of the unvested portion of each such restricted stock unit grant, representing the portion of the entire service vesting period under such grant that will have been served by Mr. Kispert as of the date that he ceases to be an employee of the Company, will be accelerated; (ii) the acceleration of the delivery of all restricted stock units for which vesting is accelerated in accordance with the provisions of the Severance and Consulting Agreement; and (iii) the extension of the post-termination exercise period of each of Mr. Kispert's stock options so that each such option will remain exercisable for twelve months following the date Mr. Kispert ceases to be an employee of the Company, but in no event beyond the original term of the award. In connection with the stock-related benefits agreed to under such agreement, the Company recorded an additional non-cash, stock-based compensation charge of approximately \$4.7 million during the three months ended September 30, 2008, which was included as a component of selling, general and administrative (SG&A) expense.

NOTE 9 STOCK REPURCHASE PROGRAM

Since July 1997, the Board of Directors has authorized the Company to systematically repurchase up to 62.8 million shares of its common stock under the repurchase program in the open market. This plan was put into place to reduce the dilution from KLA-Tencor's employee benefit and incentive plans such as the stock option and employee stock purchase plans, and to return excess cash to the Company's shareholders. Subject to market conditions, applicable legal requirements and other factors, the repurchases will be made from time to time in the open market in compliance with applicable securities laws, including the Securities Exchange Act of 1934 and the rules promulgated thereunder such as Rule 10b-18. In October 2008, the Company suspended its stock repurchase program. At December 31, 2008, 9.8 million shares were available for repurchase under the Company's repurchase program.

Share repurchases for the three and six months ended December 31, 2008 and 2007 were as follows:

(in thousands)	Three months ended		Six months ended	
	December 31, 2008	2007	December 31, 2008	2007

Edgar Filing: KLA TENCOR CORP - Form 10-Q

Number of shares of common stock repurchased	1,450	2,700	6,410	14,356
Total cost of repurchase	\$ 38,657	\$ 133,555	\$ 218,698	\$ 817,089

The \$10.4 million which was accrued in other current liabilities related to unsettled repurchases at September 30, 2008 was paid during the three months ended December 31, 2008.

Table of Contents**NOTE 10 NET INCOME (LOSS) PER SHARE**

Basic net income (loss) per share is calculated by dividing net income (loss) available to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per share is calculated by using the weighted-average number of common shares outstanding during the period increased to include the number of additional shares of common stock that would have been outstanding if the dilutive potential shares of common stock had been issued. The dilutive effect of outstanding options and restricted stock units is reflected in diluted earnings per share by application of the treasury stock method, which includes consideration of stock-based compensation required by SFAS No. 123(R), *Share-Based Payment* and SFAS No. 128, *Earnings Per Share*. The following table sets forth the computation of basic and diluted net income (loss) per share:

(In thousands, except per share amounts)	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Numerator:				
Net income (loss)	\$ (434,254)	\$ 83,935	\$ (414,965)	\$ 172,093
Denominator:				
Weighted average shares outstanding, excluding unvested restricted stock units	169,022	181,241	170,552	184,516
Effect of dilutive options and restricted stock units		3,958		4,606
Denominator for diluted income (loss) per share	169,022	185,199	170,552	189,122
Basic net income (loss) per share	\$ (2.57)	\$ 0.46	\$ (2.43)	\$ 0.93
Diluted net income (loss) per share	\$ (2.57)	\$ 0.45	\$ (2.43)	\$ 0.91
Potentially dilutive securities(1)	20,704	6,904	20,704	2,600

(1) The potentially dilutive securities are excluded from the computation of diluted net income (loss) per share for the above periods because their effect would have been anti-dilutive.

The total amount of dividends paid during the three months ended December 31, 2008 and 2007 were \$25.3 million and \$27.2 million, respectively. The total amount of dividends paid during the six months ended December 31, 2008 and 2007 were \$51.2 million and \$55.6 million, respectively.

NOTE 11 COMPREHENSIVE INCOME (LOSS)

The components of comprehensive income (loss), net of tax, are as follows:

(In thousands)	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Net income (loss)	\$ (434,254)	\$ 83,935	\$ (414,965)	\$ 172,093
Other comprehensive income (loss):				
Currency translation adjustments	(17,934)	8,002	(81,557)	22,990
Loss on cash flow hedging instruments, net	(3,638)	(1,551)	(1,502)	(10,770)
Change in unrecognized losses and transition obligation related to pension and post retirement plans	59	40	229	54
Unrealized gains on investments (1)	5,926	2,188	3,397	4,839
Other comprehensive income (loss)	(15,587)	8,679	(79,433)	17,113
Total comprehensive income (loss)	\$ (449,841)	\$ 92,614	\$ (494,398)	\$ 189,206
	\$ 3,586	\$ 1,324	\$ 2,055	\$ 2,928

(1) Tax effect of unrealized gains on investments

Table of Contents**NOTE 12 INCOME TAXES**

The Company recorded a tax benefit of \$83.8 million and \$64.0 million for the three months and six months ended December 31, 2008, which are effective tax rates of 16.2% and 13.4%, respectively. The tax benefit as a percentage of the loss for the six months ended December 31, 2008 is lower than the tax expense as a percentage of the income for the period ended June 30, 2008 primarily due to the goodwill impairment charge which is not deductible for tax purposes for the six months ended December 31, 2008, partially offset by the tax benefit related to the reinstatement of the federal research and development credit under the Emergency Economic Stabilization Act of 2008, which was signed into law on October 3, 2008.

In the normal course of business, the Company is subject to examination by taxing authorities throughout the world. The Company is not under United States federal income tax examination at this time. The Company remains subject to federal income tax examination for all years after the fiscal year ended June 30, 2004. The Company is subject to state income tax examinations for all years after the fiscal year ended June 30, 2003. The Company is also subject to examinations in major foreign jurisdictions, including Japan, Israel and Singapore, for all years after the fiscal year ended June 30, 2003 and is currently under tax examinations in various other foreign tax jurisdictions. It is reasonably possible that certain examinations may be concluded in the next twelve months. Accordingly, the Company believes it is reasonably possible that its existing unrecognized tax benefits may be reduced and recognized by up to \$7.7 million within the next twelve months as a result of the lapse of statutes of limitations, and the resolution of agreements with various foreign tax authorities.

NOTE 13 LITIGATION AND OTHER LEGAL MATTERS

Government Inquiries and SEC Settlement Relating to Historical Stock Option Practices. On May 23, 2006, the Company received a subpoena from the United States Attorney's Office (USAO) requesting information relating to the Company's past stock option grants and related accounting matters. Also on May 23, 2006, the Company received a letter from the SEC making an informal inquiry and request for information on the same subject matters. The Company learned on February 2, 2007 that the SEC had opened a formal investigation into these matters. The Company cooperated fully with the SEC investigation. On July 25, 2007, the Company announced that it had reached a settlement with the SEC by consenting to the entry of a permanent injunction against future violations of the reporting, books and records, and internal controls provisions of the federal securities laws. The settlement resolves completely the SEC investigation into the Company's historical stock option granting practices. KLA-Tencor was not charged by the SEC with fraud; nor was the Company required to pay any civil penalty, fine, or money damages as part of the settlement. On July 31, 2008, the USAO informed the Company that it had closed its investigation and had determined not to take any action against the Company. Both the SEC and USAO investigations with respect to the Company are now closed.

The Company has also responded to inquiries from the U.S. Department of Labor, which is conducting an examination of the Company's 401(k) Savings Plan prompted by the Company's stock option issues. The Company is cooperating fully with this examination and intends to continue to do so. The Internal Revenue Service conducted an audit covering calendar year 2006 related to the Company's historical stock option practices, which was concluded in July 2008 with a payment by the Company of \$0.1 million. The Company cannot predict how long it will take to or how much more time and resources it will have to expend to resolve the remaining government inquiry, nor can it predict the outcome of that inquiry. Also, there can be no assurance that other inquiries, investigations or actions will not be started by other United States federal or state regulatory agencies or by foreign governmental agencies.

Shareholder Derivative Litigation Relating to Historical Stock Option Practices. Beginning on May 22, 2006, several persons and entities identifying themselves as shareholders of KLA-Tencor filed derivative actions purporting to assert claims on behalf of and in the name of the Company against various of the Company's current and former directors and officers relating to its accounting for stock options issued from 1994 to the present. The complaints in these actions allege that the individual defendants breached their fiduciary duties and other obligations to the Company and violated state and federal securities laws in connection with the Company's historical stock option granting process, its accounting for past stock options, and historical sales of stock by the individual defendants. Three substantially similar actions are pending, one in the U.S. District Court for the Northern District of California (the Federal Derivative Action, which consists of three separate lawsuits consolidated in one action); one in the California Superior Court for Santa Clara County; and one in the Delaware Chancery Court.

The plaintiffs in the derivative actions have asserted claims for violations of Sections 10(b) (including Rule 10b-5 thereunder), 14(a), and 20(a) of the Securities Exchange Act of 1934, unjust enrichment, breach of fiduciary duty and aiding and abetting such breach, negligence, misappropriation of information, abuse of control, gross mismanagement, waste of corporate assets, breach of contract, constructive fraud, rescission, and violations of California Corporations Code section 25402, as well as a claim for an accounting of all stock option grants made to the named defendants. KLA-Tencor is named as a nominal defendant in these actions. On behalf of KLA-Tencor, the plaintiffs seek unspecified monetary and other relief against the named defendants. The plaintiffs are James Ziolkowski, Mark Ziering, Alaska Electrical Pension Fund, Jeffrey Rabin, and Benjamin Langford. The individual named defendants are current directors and officers Edward W. Barnholt, Robert T. Bond, Stephen P. Kaufman, and Richard P. Wallace; and former directors and officers H. Raymond Bingham, Robert J. Boehlke, Leo Chamberlain, Gary E. Dickerson, Richard J. Elkus, Jr.,

Table of Contents

Dennis J. Fortino, Jeffrey L. Hall, John H. Kispert, Kenneth Levy, Michael E. Marks, Stuart J. Nichols, Arthur P. Schnitzer, Kenneth L. Schroeder, Jon D. Tompkins, and Lida Urbanek. Current director David C. Wang and former director Dean O. Morton were originally named as defendants in one of the derivative actions filed in the U.S. District Court for the Northern District of California, but were dropped as named defendants as of December 22, 2006 upon the filing of a consolidated complaint in that action.

The derivative actions are at an early procedural stage. The defendants are not yet required to respond to the complaints in any of the derivative actions. The Company's Board of Directors has appointed a Special Litigation Committee (SLC) composed solely of independent directors to conduct an independent investigation of the claims asserted in the derivative actions and to determine the Company's position with respect to those claims. On March 25, 2008, the SLC filed a motion to terminate the Federal Derivative Action and to approve certain settlements with Gary E. Dickerson, Kenneth Levy, Kenneth Schroeder and Jon D. Tompkins related to the claims brought against them in connection with the derivative actions. The Court denied the motion to terminate and to approve the settlements on December 12, 2008. The SLC has filed an appeal of that decision to the United States Court of Appeals for the Ninth Circuit. The defendants have not yet responded to the complaint in the Federal Derivative Action and will not be required to do so until after plaintiff has had an opportunity to amend the complaint. The parties are expected to participate in a mediation of the derivative claims. No defendant is yet required to answer the complaints in the state court derivative actions in the California Superior Court for Santa Clara County and the Delaware Chancery Court, each of which was stayed pending a ruling on the SLC's motion to terminate the Federal Derivative Action. It is not known whether the stays on the state court derivative actions will continue.

The Company cannot predict whether these derivative actions are likely to result in any material recovery by or expense to KLA-Tencor.

Shareholder Class Action Litigation Relating to Historical Stock Option Practices. KLA-Tencor and various of its current and former directors and officers were named as defendants in a putative securities class action filed on June 29, 2006 in the U.S. District Court for the Northern District of California. Two similar actions were filed later in the same court, and all three cases were consolidated into a single action. On September 26, 2008, Judge Charles Breyer of the Northern District granted final approval of a settlement resolving all class claims and dismissing with prejudice all claims brought by the consolidated action. The class action had alleged material misrepresentations in the Company's SEC filings and public statements and brought claims under Section 10(b) and Rule 10b-5 thereunder, Section 14(a), Section 20(a), and Section 20A of the Securities Exchange Act of 1934 as a result of the Company's past stock option grants and related accounting and reporting. The settlement resolved all claims against all defendants, who were KLA-Tencor, Edward W. Barnholt, H. Raymond Bingham, Robert T. Bond, Gary E. Dickerson, Richard J. Elkus, Jr., Jeffrey L. Hall, Stephen P. Kaufman, John H. Kispert, Kenneth Levy, Michael E. Marks, Stuart J. Nichols, Kenneth L. Schroeder, Jon D. Tompkins, Lida Urbanek and Richard P. Wallace.

The Company made a payment of \$65.0 million to the settlement class as a term of the court-approved settlement during the three months ended September 30, 2008, which provides a full release of KLA-Tencor and the other named defendants in connection with the allegation raised in the lawsuit. The Company had reached an agreement in principle to resolve the action prior to December 31, 2007, and therefore an amount of \$65.0 million was accrued by a charge to selling, general and administrative expenses during the three months ended December 31, 2007.

As part of a derivative lawsuit filed in the Delaware Chancery Court on July 21, 2006, a plaintiff claiming to be a KLA-Tencor shareholder also asserted a separate putative class action claim against the Company and certain of its current and former directors and officers alleging that shareholders incurred damage due to purported dilution of KLA-Tencor common stock resulting from historical stock option granting practices. The Company's motion to dismiss this claim is under submission.

Another plaintiff, Chris Crimi, filed a putative class action complaint in the Superior Court of the State of California for the County of Santa Clara on September 4, 2007 against the Company and certain of its current and former directors and officers. The plaintiff seeks to represent a class consisting of persons who held KLA-Tencor common stock between September 20, 2002 and September 27, 2006, originally alleged causes of action for breach of fiduciary duty and rescission based on alleged misstatements and omissions in the Company's SEC filings concerning the Company's past stock option grants, and seeks unspecified damages based upon purported dilution of the Company's stock, injunctive relief, and rescission. The named defendants, in addition to the Company, are Edward W. Barnholt, H. Raymond Bingham, Robert T. Bond, Richard J. Elkus, Jr., Stephen P. Kaufman, Kenneth Levy, Michael E. Marks, Dean O. Morton, Kenneth L. Schroeder, Jon D. Tompkins, and Richard P. Wallace. The Company filed a demurrer to the complaint, which was sustained, and then removed the case to the U.S. District Court for the Northern District of California upon plaintiff's filing an amended complaint. The Company then filed a motion to dismiss the action in the Northern District of California, which was granted in part, with the remaining claims being remanded back to the California Superior Court on September 12, 2008. This litigation is at an early stage, and the individual defendants have not yet been required to respond to the complaint. The Company has filed a demurrer to plaintiff's Second Amended Complaint, which is scheduled to be heard on February 6, 2009, and intends to vigorously defend this litigation.

The Company cannot predict the outcome of the shareholder class action claims brought in the lawsuits filed in the Delaware Chancery Court and the California Superior Court, and it cannot estimate the likelihood or potential dollar amount of any adverse results. However, an unfavorable outcome in this litigation could have a material adverse impact upon the financial position, results of

operations or cash flows for the period in which the outcome occurs and in future periods.

Table of Contents

Indemnification Obligations. Subject to certain limitations, the Company is obligated to indemnify its current and former directors, officers and employees in connection with the investigation of the Company's historical stock option practices and the related litigation and ongoing government inquiry. These obligations arise under the terms of the Company's certificate of incorporation, its bylaws, applicable contracts, and Delaware and California law. The obligation to indemnify generally means that the Company is required to pay or reimburse the individuals' reasonable legal expenses and possibly damages and other liabilities incurred in connection with these matters. The Company is currently paying or reimbursing legal expenses being incurred in connection with these matters by a number of its current and former directors, officers and employees. It is also paying defense costs to two former officers and employees facing SEC civil actions to which the Company is not a party. Although the maximum potential amount of future payments KLA-Tencor could be required to make under these agreements is theoretically unlimited, the Company believes the fair value of this liability, to the extent estimable, is appropriately considered within the reserve it has established for currently pending legal proceedings.

Other Legal Matters. The Company is named from time to time as a party to lawsuits in the normal course of its business. Litigation, in general, and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of legal proceedings are difficult to predict, and the costs incurred in litigation can be substantial, regardless of outcome.

NOTE 14 COMMITMENTS AND CONTINGENCIES

Factoring. KLA-Tencor has agreements with financial institutions to sell certain of its trade receivables and promissory notes from customers without recourse. KLA-Tencor does not believe it is at risk for any material losses as a result of these agreements. In addition, from time to time KLA-Tencor will discount without recourse Letters of Credit (LCs) received from customers in payment for goods.

The following table shows total receivables sold under factoring agreements and proceeds from sales of LCs and related discounting fees paid for the three and six months ended December 31, 2008 and 2007:

(In thousands)	Three months ended		Six months ended	
	December 31, 2008	December 31, 2007	December 31, 2008	December 31, 2007
Receivables sold under factoring agreements	\$ 76,368	\$ 84,879	\$ 158,639	\$ 155,413
Proceeds from sales of LCs	\$ 2,280	\$ 10,710	\$ 10,666	\$ 17,528
Discounting fees paid on sales of LCs (1)	\$ 6	\$ 56	\$ 44	\$ 77

(1) Discounting fees were equivalent to interest expense and were recorded in interest income and other, net.

Facilities. KLA-Tencor leases certain of its facilities under arrangements, which qualify for operating lease accounting treatment under SFAS No. 13, *Accounting for Leases*.

The following is a schedule of operating lease payments (in thousands):

Fiscal year ended June 30,	Amount
2009 (remaining 6 months)	\$ 6,296
2010	10,462
2011	7,538
2012	3,794
2013	3,099
2014 and thereafter	8,535
Total minimum lease payments	\$ 39,724

Rent expense was approximately \$3.3 million and \$3.0 million for the three months ended December 31, 2008 and 2007, respectively. Rent expense was approximately \$6.0 million and \$6.0 million for the six months ended December 31, 2008 and 2007, respectively.

Table of Contents

Purchase Commitments. KLA-Tencor maintains certain open inventory purchase commitments with its suppliers to ensure a smooth and continuous supply for key components. KLA-Tencor's liability under these purchase commitments is generally restricted to a forecasted time-horizon as mutually agreed upon between the parties. This forecast time-horizon can vary among different suppliers. The Company's open inventory purchase commitments were approximately \$83.4 million as of December 31, 2008 and are primarily due within the next 12 months. Actual expenditures will vary based upon the volume of the transactions and length of contractual service provided. In addition, the amounts paid under these arrangements may change in the event that the arrangements are renegotiated or canceled. Certain agreements provide for potential cancellation penalties.

Guarantees. KLA-Tencor provides standard warranty coverage on its systems for twelve months, providing labor and parts necessary to repair the systems during the warranty period. KLA-Tencor accounts for the estimated warranty cost as a charge to cost of revenues when system revenue is recognized. The estimated warranty cost is based on historical product performance and field expenses. Utilizing actual service records, KLA-Tencor calculates the average service hours and parts expense per system and applies the actual labor and overhead rates to determine the estimated warranty charge. KLA-Tencor updates these estimated charges periodically. The actual product performance and/or field expense profiles may differ, and in those cases KLA-Tencor adjusts its warranty accruals accordingly.

The following table provides the balances and changes in the product warranty accrual for the three and six months ended December 31, 2008 and 2007:

(In thousands)	Three months ended December 31,		Six months ended December 31,	
	2008	2007	2008	2007
Beginning balance	\$ 33,917	\$ 51,278	\$ 38,700	\$ 52,838
Accruals for warranties issued during the period	4,063	10,613	9,205	25,458
Changes in liability related to pre-existing warranties	(1,014)	(1,369)	1,401	(1,865)
Settlements made during the period	(9,936)	(13,694)	(22,277)	(29,603)
Ending balance	\$ 27,029	\$ 46,828	\$ 27,029	\$ 46,828

Subject to certain limitations, KLA-Tencor indemnifies its current and former officers and directors for certain events or occurrences. Although the maximum potential amount of future payments KLA-Tencor could be required to make under these agreements is theoretically unlimited, the Company believes the fair value of this liability, to the extent estimable, is appropriately considered within the reserve it has established for currently pending legal proceedings.

KLA-Tencor is a party to a variety of agreements pursuant to which it may be obligated to indemnify the other party with respect to certain matters. Typically, these obligations arise in connection with contracts and license agreements or the sale of assets, under which the Company customarily agrees to hold the other party harmless against losses arising from a breach of warranties, representations and covenants related to such matters as title to assets sold, validity of certain intellectual property rights, non-infringement of third-party rights, and certain income tax-related matters. In each of these circumstances, payment by the Company is typically subject to the other party making a claim to and cooperating with the Company pursuant to the procedures specified in the particular contract. This usually allows the Company to challenge the other party's claims or, in case of breach of intellectual property representations or covenants, to control the defense or settlement of any third-party claims brought against the other party. Further, the Company's obligations under these agreements may be limited in terms of amounts, activity (typically at the Company's option to replace or correct the products or terminate the agreement with a refund to the other party), and duration. In some instances, the Company may have recourse against third parties and/or insurance covering certain payments made by the Company.

It is not possible to predict the maximum potential amount of future payments under these or similar agreements due to the conditional nature of the Company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the Company under these agreements have not had a material effect on its business, financial condition, results of operations or cash flows.

The Company maintains guarantee arrangements of \$30.1 million in various locations to fund customs guarantees for VAT and letter of credit needs of its subsidiaries in Europe and Asia. Approximately \$21.6 million was outstanding under these arrangements as of December 31, 2008.

NOTE 15 RESTRUCTURING CHARGES

Edgar Filing: KLA TENCOR CORP - Form 10-Q

In November 2008, the Company announced a plan to reduce its global workforce by approximately 15% by June 30, 2009. This reduction is one of many cost-reduction actions that the Company is taking in an effort to lower its quarterly operating expense run rate by the end of fiscal year 2009 in response to the current demand environment. The program in the United States is accounted for in accordance with SFAS No. 112, *Employers' Accounting for Postemployment Benefits: an amendment of Financial Accounting Standards Board Statements No. 5 and 43*, whereas the programs in the international locations are accounted for in accordance with SFAS No. 5, *Accounting for Contingencies*. During the three months ended December 31, 2008, the Company recorded a \$21.8

Table of Contents

million net restructuring charge, of which \$8.8 million was recorded to costs of revenues, \$4.4 million to engineering, research and development expense and \$8.6 million to selling, general and administrative expense. This charge represents the estimated minimum liability associated with expected termination benefits to be provided to employees after employment.

The following table shows the activity primarily related to severance and benefits expense for the three months ended December 31, 2008:

(in thousands)	Three months ended December 31, 2008
Balance as of September 30, 2008	\$ 1,333
Restructuring costs	23,142
Adjustments	(1,333)
Cash payments	(4,435)
 Balance as of December 31, 2008	 \$ 18,707

Substantially all of the restructuring charges related to the Company's workforce reduction announced in November 2008 are expected to be paid out during the fiscal year ending June 30, 2009.

NOTE 16 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

KLA-Tencor's foreign subsidiaries operate and sell KLA-Tencor's products in various global markets. As a result, KLA-Tencor is exposed to changes in foreign currency exchange rates. KLA-Tencor utilizes foreign currency forward exchange contracts and options to hedge against future movements in foreign exchange rates that affect certain existing and forecasted foreign currency denominated sales and purchase transactions. KLA-Tencor does not use derivative financial instruments for speculative or trading purposes.

The outstanding hedge contracts, with maximum maturity of 13 months, were as follows:

(In thousands)	As of December 31, 2008	As of June 30, 2008
Cash flow hedge contracts		
Purchase	\$ 3,030	\$ 7,413
Sell	(89,697)	(200,676)
Other foreign currency hedge contracts		
Purchase	129,146	1,278,395
Sell	(235,854)	(1,402,119)
 Net	 \$ (193,375)	 \$ (316,987)

NOTE 17 RELATED PARTY TRANSACTIONS

During the three and six months ended December 31, 2008 and 2007, the Company purchased from, or sold to, JDS Uniphase Corporation, Freescale Semiconductor, Inc., National Semiconductor Corp., STMicroelectronics, NV and Oracle Corporation, where one or more members of the Company's Board of Directors also serves as an executive officer or board member. For the three months ended December 31, 2008 and 2007, the Company's total revenues from transactions with these parties (for the portion of such period that they were considered related) were approximately \$1 million and \$9 million, respectively. In addition, for the three months ended December 31, 2008 and 2007, the Company's total purchases from transactions with these parties (for the portion of such period that they were considered related) were approximately \$100,000 and \$2 million, respectively. For the six months ended December 31, 2008 and 2007, the Company's total revenues from transactions with these parties (for the portion of such period that they were considered related) were approximately \$4 million and \$21 million, respectively. In addition, for the six months ended December 31, 2008 and 2007, the Company's total purchases from transactions with these parties (for the portion of such period that they were considered related) were approximately \$1 million and \$4 million, respectively. The Company had a receivable balance from these parties of approximately \$1 million and \$13 million at December 31, 2008 and June 30, 2008, respectively. Management believes that such transactions are at arms length and on similar terms as would have been obtained from unaffiliated third parties.

NOTE 18 SEGMENT REPORTING AND GEOGRAPHIC INFORMATION

Edgar Filing: KLA TENCOR CORP - Form 10-Q

KLA-Tencor reports one reportable segment in accordance with the provisions of SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. Operating segments are defined as components of an enterprise about which separate financial information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. KLA-Tencor's chief operating decision maker is the Chief Executive Officer.

Table of Contents

KLA-Tencor is engaged primarily in designing, manufacturing, and marketing process control and yield management solutions for the semiconductor and related nanoelectronics industries. All operating units have been aggregated due to their inter-dependencies, commonality of long-term economic characteristics, products and services, the production processes, class of customer and distribution processes. The Company's service products are an extension of the system product portfolio and provide customers with spare parts and fab management services (including system preventive maintenance and optimization services) to improve yield, increase production uptime and throughput, and lower the cost of ownership. Since KLA-Tencor operates in one segment, all financial segment information required by SFAS No. 131 can be found in the condensed consolidated financial statements.

KLA-Tencor's significant operations outside the United States include manufacturing facilities in Israel and Singapore, and sales, marketing and service offices in Western Europe, Japan and the Asia Pacific region. For geographical revenue reporting, revenues are attributed to the geographic location in which the customer is located. Long-lived assets consist primarily of net property and equipment and are attributed to the geographic region in which they are located.

The following is a summary of revenues by geographic region for the three and six months ended December 31, 2008 and 2007:

(Dollar amounts in thousands)	Three months ended December 31,				Six months ended December 31,			
	2008		2007		2008		2007	
Revenues:								
United States	\$ 68,772	17%	\$ 90,635	14%	\$ 159,326	17%	\$ 237,587	18%
Taiwan	36,621	9%	168,586	27%	122,139	13%	365,600	28%
Japan	117,891	30%	173,203	27%	287,798	31%	355,414	27%
Europe & Israel	53,661	14%	93,135	15%	97,087	11%	162,913	12%
Korea	44,750	11%	51,473	8%	132,611	14%	85,532	6%
Rest of Asia Pacific	74,894	19%	58,751	9%	130,141	14%	121,757	9%
Total	\$ 396,589	100%	\$ 635,783	100%	\$ 929,102	100%	\$ 1,328,803	100%

Long-lived assets by geographic region as of December 31, 2008 and June 30, 2008 were as follows:

(In thousands)	December 31, 2008	June 30, 2008
Long-lived assets:		
United States	\$ 221,474	\$ 253,186
Taiwan	1,256	1,701
Japan	6,492	5,473
Europe & Israel	33,333	36,432
Korea	4,121	6,012
Rest of Asia Pacific	71,638	70,465
Total	\$ 338,314	\$ 373,269

The following is a summary of revenues by major products for the three and six months ended December 31, 2008 and 2007 (as a percentage of total revenue):

(Dollar amounts in thousands)	Three months ended December 31,				Six months ended December 31,			
	2008		2007		2008		2007	
Revenues:								
Defect inspection	\$ 198,899	50%	\$ 378,636	60%	\$ 500,596	54%	\$ 784,625	59%
Metrology	64,823	16%	117,146	18%	150,632	16%	271,696	20%
Service	116,913	30%	120,288	19%	241,975	26%	232,623	18%
Other	15,954	4%	19,713	3%	35,899	4%	39,859	3%
Total	\$ 396,589	100%	\$ 635,783	100%	\$ 929,102	100%	\$ 1,328,803	100%

Edgar Filing: KLA TENCOR CORP - Form 10-Q

For the three months ended December 31, 2008, two customers accounted for greater than 10% of revenue. For the six months ended December 31, 2008, one customer accounted for greater than 10% of revenue. For the three and six months ended December 31, 2007, no customer accounted for greater than 10% of revenue. As of December 31, 2008, one customer accounted for greater than 10% of net accounts receivable, and as of June 30, 2008, no customer accounted for greater than 10% of net accounts receivable.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This report contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact may be forward-looking statements. You can identify these and other forward-looking statements by the use of words such as may, will, could, would, should, expects, plans, anticipates, relies, believes, estimates, predicts, intends, potential, continue, thinks, seeks, or the negative of such terms, or other comparable terminology. Forward-looking statements also include the assumptions underlying or relating to any of the foregoing statements. Such forward-looking statements include, among others, forecasts of the future results of our operations; the percentage of spending that our customers allocate to process control; orders for our products and capital equipment generally; sales of semiconductors; the allocation of capital spending by our customers; growth of revenue in the semiconductor industry, the semiconductor capital equipment industry and our business; technological trends in the semiconductor industry; future developments or trends in the global capital and financial markets; the availability of the offer to repurchase our auction rate securities by the securities firm from which we purchased such securities; the future impact of the restatement of our historical financial statements, shareholder litigation and related matters arising from the discovery that we had retroactively priced stock options (primarily from July 1, 1997 to June 30, 2002) and had not accounted for them correctly; our future product offerings and product features; the success and market acceptance of new products; timing of shipment of backlog; the future of our product shipments and our product and service revenues; our future gross margins; our future selling, general and administrative expenses; international sales and operations; our ability to maintain or improve our existing competitive position; success of our product offerings; creation and funding of programs for research and development; attraction and retention of employees; results of our investment in leading edge technologies; the effects of hedging transactions; the effect of the sale of trade receivables and promissory notes from customers; our future income tax rate; dividends; the completion of any acquisitions of third parties, or the technology or assets thereof; benefits received from any acquisitions and development of acquired technologies; sufficiency of our existing cash balance, investments and cash generated from operations to meet our operating and working capital requirements; and the adoption of new accounting pronouncements.

Our actual results may differ significantly from those projected in the forward-looking statements in this report. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in Part II, Item 1A, Risk Factors in this report as well as in Item 1, Business and Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended June 30, 2008, filed with the Securities and Exchange Commission on August 7, 2008. You should carefully review these risks and also review the risks described in this document and the other documents we file from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q that we will file during the remainder of the fiscal year ending June 30, 2009. You are cautioned not to place undue reliance on these forward-looking statements, and we expressly assume no obligation to update the forward-looking statements in this report after the date hereof.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

The preparation of our Condensed Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions in applying our accounting policies that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Note 1 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended June 30, 2008 describes the significant accounting policies and methods used in preparation of the Consolidated Financial Statements. We based these estimates and assumptions on historical experience, and evaluate them on an on-going basis to ensure that they remain reasonable under current conditions. Actual results could differ from those estimates. We discuss the development and selection of the critical accounting estimates with the Audit Committee of our Board of Directors on a quarterly basis, and the Audit Committee has reviewed the Company's related disclosure in this Quarterly Report on Form 10-Q. The accounting policies that reflect our more significant estimates, judgments and assumptions and which we believe are the most critical to aid in fully understanding and evaluating our reported financial results include the following:

Revenue Recognition

Inventories

Warranty

Allowance for Doubtful Accounts

Stock-Based Compensation

Contingencies and Litigation

Goodwill and Intangible Assets

Income Taxes

26

Table of Contents

System revenues recognized without a written acceptance from the customer were approximately 15%, 14% and 14% of total revenues for the three months ended December 31, 2008, September 30, 2008 and December 31, 2007, respectively. The percentage of system revenues recognized without a written acceptance from the customer has remained relatively flat from three months ended September 30, 2008 compared to three months ended December 31, 2008. Shipping charges billed to customers are included in system revenues, and the related shipping costs are included in costs of revenues.

With the exception of the below paragraph that discusses the valuation of goodwill and intangible assets and impact of Statement of Financial Accounting Standards (SFAS) No. 157 on our critical accounting estimates and policies for fair value measurements, during the three months ended December 31, 2008 there were no significant changes in our critical accounting estimates and policies. Please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended June 30, 2008 for a more complete discussion of our critical accounting policies and estimates.

Valuation of Goodwill and Intangible Assets

We assess goodwill for impairment annually as well as whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Long-lived assets are tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. We completed our annual evaluation of goodwill by reporting unit for the three months ended December 31, 2008, and concluded that the carrying value of our Metrology reporting unit exceeded its estimated fair value. Our impairment evaluation of goodwill is based on comparing the fair value of our reporting units to their carrying value. Fair value was determined by using a weighted combination of two market-based approaches and an income approach, as this combination was deemed to be the most indicative of our reporting unit fair values in an orderly transaction between market participants. Under the market-based approaches, we utilized information regarding us as well as publicly available industry information to determine earnings multiples and sales multiples that are used to value our reporting units. We assigned a higher weighting to the discounted cash flow due to the fact that current market conditions are depressed (as compared to the goodwill evaluation performed in fiscal year 2008, when we assigned equal weighting for each of the three approaches). Under the income approach, we determined the fair value based on estimated future cash flows of each reporting unit, discounted by an estimated weighted-average cost of capital, which reflects the overall level of inherent risk of a reporting unit and the rate of return an outside investor would expect to earn. Determining the fair value of a reporting unit is judgmental in nature and requires the use of significant estimates and assumptions, including revenue growth rates and operating margins, discount rates and future market conditions, among others. Unanticipated changes in revenue, gross margin, long-term growth factor or discount rate could result in a material impact on the estimated fair values of our reporting units.

Solely for purposes of establishing inputs for the fair value calculations described above related to goodwill impairment testing, we made the following assumptions. We assumed that the current economic downturn would continue through fiscal year 2010, followed by a recovery period in fiscal years 2011 and 2012, and long-term industry growth past fiscal year 2012. In addition, we applied gross margin assumptions consistent with our historical trends at various revenue levels and used a 5% growth factor to calculate the terminal value of our reporting units, which was consistent with the rate we used in the prior year. We also used a 13% discount rate to calculate the terminal value of our reporting units, which is slightly lower than the 14% discount rate we used in the prior year, primarily due to the fact that in April 2008 we issued \$750 million of unsecured long-term debt due in 2018, which reduced our weighted average cost of capital. As a result of our recently completed annual goodwill impairment testing, we wrote off all \$272.1 million of our goodwill associated with our Metrology reporting unit. If we were to decrease the long-term growth factor or increase the discount rate used in the calculation by 1%, there would be no change in the impairment amount for the Metrology or any other reporting units. If we were to increase the growth factor by 1%, the impairment amount for the Metrology reporting unit would be reduced by approximately \$44 million. If we were to decrease the discount rate used in the calculation by 1%, the impairment amount for the Metrology reporting unit would be reduced by approximately \$16 million. We believe that the assumptions and rates used in our annual impairment test under SFAS No. 142 are reasonable, but they are judgmental, and variations in any of the assumptions or rates could result in materially different calculations of impairment amounts. The sum of the fair values of the reporting units was reconciled to our current market capitalization (based upon our stock price) plus an estimated control premium.

Given the current economic environment and the uncertainties regarding the impact on our business, there can be no assurance that our estimates and assumptions regarding the duration of the ongoing economic downturn, or the period or strength of recovery, made for purposes of our goodwill impairment testing during the three months ended December 31, 2008 will prove to be accurate predictions of the future. If our assumptions regarding forecasted revenue or margin growth rates of certain reporting units are not achieved, we may be required to record additional goodwill impairment charges in future periods, whether in connection with our next annual impairment testing in the second quarter of fiscal year 2010 or prior to that, if any such change constitutes a triggering event outside of the quarter from when the annual goodwill impairment test is performed. It is not possible at this time to determine if any such future impairment charge would result or, if it does, whether such charge would be material.

During the quarter ended December 31, 2008, the economic conditions that affect our industry have deteriorated, which has led customers to scale back their production operations and reduce their capital expenditures. Industry analysts expect demand for semiconductor capital equipment to continue to remain weak until macroeconomic conditions improve. In addition, we experienced a

Table of Contents

significant decline in our stock price, resulting in a significant reduction in our market capitalization. Accordingly, we performed an assessment of our purchased intangible assets to test for recoverability in accordance with SFAS No. 144. The assessment of recoverability is based on management's estimates. If undiscounted projected future operating cash flows do not exceed the net book value of the long-lived assets, a permanent impairment has occurred. We would record the difference between the net book value of the long-lived asset and the fair value of such asset as a charge against income in our condensed consolidated statements of operations, if such a difference arose. The fair value is determined using the income approach, which is a present value technique used to measure the fair value of future cash flows produced by each asset group. We estimated the future cash flows over the weighted average of the remaining useful lives of our intangible assets, which ranges from 1 to 6 years, using a 13% discount rate. Based on the assessment, we recorded an intangible asset impairment charge of \$162.8 million during the three months ended December 31, 2008, of which \$73.1 million related to existing technology, \$26.3 million to patents, \$38.1 million to customer relationships, \$16.6 million to trademarks, and \$8.7 million to other intangible assets.

Adoption of SFAS No. 157

We adopted SFAS No. 157 as of the beginning of fiscal year 2009. In February 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) SFAS No. 157-2, which allows companies to elect a one-year delay in applying SFAS No. 157 to certain fair value measurements, primarily related to nonfinancial instruments. The Company elected the delayed adoption date for the portions of SFAS No. 157 impacted by FSP SFAS No. 157-2. SFAS No. 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under SFAS No. 157 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under SFAS No. 157 must maximize the use of observable inputs and minimize the use of unobservable inputs. The adoption of this statement did not have a material impact on our consolidated results of operations and financial condition. See Note 2, Fair Value Measurements, to the Condensed Consolidated Financial Statements.

We adopted SFAS No. 159, which permits entities to elect, at specified election dates, to measure eligible financial instruments at fair value. See Note 2, Fair Value Measurements, to the Condensed Consolidated Financial Statements.

Recent Accounting Pronouncements. On August 27, 2008, the U.S. Securities and Exchange Commission (SEC) announced that they will issue for comment a proposed roadmap regarding the potential use by U.S. issuers of financial statements prepared in accordance with International Financial Reporting Standards (IFRS). IFRS is a comprehensive series of accounting standards published by the International Accounting Standards Board. Under the proposed roadmap, we could be required in fiscal 2014 to prepare financial statements in accordance with IFRS, and the SEC will make a determination in 2011 regarding the mandatory adoption of IFRS. We are currently assessing the impact that this potential change would have on our consolidated financial statements, and we will continue to monitor the development of the potential implementation of IFRS.

In October 2008, the FASB issued FSP SFAS No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active*. FSP SFAS No. 157-3 clarifies the application of SFAS No. 157, which we adopted as of July 1, 2008, in situations where the market is not active. We have considered the guidance provided by FSP SFAS No. 157-3 in our determination of estimated fair values, and the impact was not material.

In December 2008, FASB issued FSP SFAS No. 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*. FSP SFAS No. 132(R)-1 amends SFAS No. 132(R) to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The FSP requires disclosures surrounding how investment allocation decisions are made, including the factors that are pertinent to an understanding of investment policies and strategies. The disclosure requirement under this FSP is effective for our fiscal year beginning July 1, 2010.

EXECUTIVE SUMMARY

KLA-Tencor Corporation is the world's leading supplier of process control and yield management solutions for the semiconductor and related nanoelectronics industries. Within our primary area of focus, our comprehensive portfolio of products, services, software and expertise helps integrated circuit manufacturers manage yield throughout the entire wafer fabrication process from research and development to final volume production.

Our products and services are used by virtually every major wafer, IC and photomask manufacturer in the world. Our revenues are driven largely by capital spending by our customers who operate in one or more of several key semiconductor markets, including the memory, foundry and logic markets. Our customers purchase our products to either ramp up production in response to the need to drive advances in process technologies or to satisfy demand from industries such as communication, data processing, consumer electronics, automotive and aerospace. We believe that our customers will continue to invest in advanced technologies and new materials to enable smaller design rules and higher density applications, as well as reduced cost, which in turn will drive increased

adoption of process control to reduce defectivity.

Table of Contents

During the second quarter of fiscal 2009, it became apparent that we were entering into a global economic downturn. Since that time, the economic conditions that affect our industry have deteriorated, which has led our customers to scale back their production operations and reduce their capital expenditures. We cannot predict the severity or duration of this economic downturn, but we expect that the recent deterioration in business conditions in our markets will result in continued depressed levels of new orders and revenues, as well as operating losses, in the near term. Our operating results will be adversely affected for as long as the current challenging market conditions persist.

The demand for our products is affected by the profitability of our customers, which is driven by capacity and market supply for their products. Industry analysts expect demand for semiconductor capital equipment to continue to remain weak until macroeconomic conditions improve. As described in more detail below, such continued weakness would affect our revenue levels and results of operations in future quarters. While semiconductor content in communication, data processing, consumer electronics, automotive and aerospace products continues to increase, the global economic weakness has adversely impacted our customers that operate in those industries. In addition, the demand for our products has been adversely affected by lower profitability of our customers, especially in the memory market (which had constituted an increased share of our revenues for the past several years), as well as the weak macroeconomic and credit environment and its overall impact on capital spending. Our revenues have declined sequentially over the past six quarters and reflect slowing demand for semiconductor equipment.

We have lowered our production volumes in response to anticipated near-term business levels in an effort to tailor our operations to expected demand levels. However, we expect that our reduced scale of operations will lead to increased inventory-related charges (as our manufacturing inventory requirements decline) and reduced manufacturing capacity utilization, which in each case will adversely impact our results of operations. In addition, we expect that recent declines in factory utilization by our customers will result in lower service revenue levels and additional inventory related-charges (due to the related decline in customer usage of our systems) for so long as such conditions persist. During the second quarter of fiscal 2009, we announced a global workforce reduction and other cost-reduction efforts aimed at lowering our operating expenses in response to the current demand environment, and we are evaluating further cost-reduction activities in the event that business conditions continue to deteriorate. These further activities, if implemented, will result in additional near-term charges. However, we believe that our cost-reduction efforts, combined with our strategy and our ability to innovate and execute, will enable us to strengthen our relative competitive position in the current difficult business environment, and will put us in position to take advantage of long-term growth opportunities.

As a supplier to the global semiconductor and semiconductor-related industries, we are subject to business cycles, the timing, length and volatility of which can be difficult to predict. The industries we serve have historically been cyclical due to sudden changes in demand and manufacturing capacity. We expect our customers' technology-related capital spending on process control (as differentiated from capacity-related capital spending) to increase over the long term, as technology spending is driven by the demand for more precise diagnostics capabilities to address multiple new defects as a result of further shrinking of device feature sizes, the transition to new materials, new devices and circuit architecture, new lithography challenges and fab process innovation. However, our ability to predict future capacity-related capital spending by our customers is more limited, as such spending is more closely connected to the unpredictable business cycles within their industries.

We had a consolidated net loss of \$434.3 million in the second quarter of fiscal 2009. The results for the quarter ended December 31, 2008 reflect (1) a \$434.8 million non-cash charge resulting from the impairment of our goodwill and purchased intangible assets, (2) the impact of lower product revenues as customers delay their equipment purchases and installations, (3) lower service revenues as customers idle under-utilized production equipment, (4) a \$29.0 million charge related to inventory write-downs, driven by declines in our product build plans and service inventory usage, (5) decreased manufacturing capacity utilization as we reduce our production volume, (6) a \$23.1 million restructuring charge related to our global workforce reduction and other cost-reduction activities implemented during the quarter, and (7) a \$23.9 million increase in the allowance for doubtful accounts for potential losses relating to a heightened risk of non-payment of accounts receivable by customers facing financial difficulty.

The following table sets forth some of the key quarterly unaudited financial information which we use to manage our business.

(In thousands, except net income (loss) per share -diluted)	Three months ended			Fiscal year 2008		
	December 31, 2008	September 30, 2008	June 30, 2008	March 31, 2008	December 31, 2007	September 30, 2007
Revenues	\$ 396,589	\$ 532,513	\$ 590,694	\$ 602,219	\$ 635,783	\$ 693,020
Income (loss) from operations	\$ (505,631)	\$ 34,938	\$ 103,411	\$ 125,200	\$ 93,487	\$ 177,278
Net income (loss)	\$ (434,254)	\$ 19,289	\$ 76,010	\$ 110,980	\$ 83,935	\$ 88,158
Cash flow from operations	\$ (35,600)	\$ 81,357	\$ 188,374	\$ 148,212	\$ 125,208	\$ 205,785
Net income (loss) per share - diluted	\$ (2.57)	\$ 0.11	\$ 0.43	\$ 0.61	\$ 0.45	\$ 0.46

Stock-based compensation expense included in costs of revenues	\$ 10,135	\$ 10,953	\$ (818)	-7%

Product revenues

Product revenues decreased during the three months ended December 31, 2008 from the three months ended September 30, 2008 and December 31, 2007 as a result of continued reduction in capital spending by our customers due to ongoing weakness in the semiconductor industry and a deteriorating macroeconomic environment which has resulted in customers delaying their purchases and installations of our products. The continued decline in revenues reflects slowing worldwide demand for semiconductor equipment, as semiconductor companies reduce capital spending and conserve cash in response to their business environment, even as their need for more precise diagnostics capabilities increases with technological advances. Our product revenues continue to be adversely affected by various factors, such as global economic conditions resulting in lower profitability of our customers, as well as the weak macroeconomic and credit environment and its overall impact on capital spending, which are likely to result in product revenues in the near term that are lower than revenue levels in comparable periods during prior fiscal years.

For the three months ended December 31, 2008, two customers accounted for greater than 10% of total revenues. For the three and six months ended December 31, 2007, no customer accounted for greater than 10% of total revenues. As of December 31, 2008, one customer accounted for greater than 10% of net accounts receivable, and as of June 30, 2008, no customer accounted for greater than 10% of net accounts receivable.

Service revenues

Service revenues are generated from maintenance service contracts, as well as time and material billable service calls made to our customers after the expiration of the warranty period. Service revenue decreased slightly in the three months ended December 31, 2008 compared to September 30, 2008 as customers idled their under-utilized production equipment as a result of the ongoing weakness in the semiconductor industry and a deteriorating macroeconomic environment. The amount of service revenues generated is generally a function of the number of post-warranty systems installed at our customers' sites and the utilization of those systems.

Table of Contents**Revenues by region**

Revenues by region for the periods indicated were as follows:

(Dollar amounts in thousands)	Three months ended					
	December 31, 2008		September 30, 2008		December 31, 2007	
United States	\$ 68,772	17%	\$ 90,554	17%	\$ 90,635	14%
Taiwan	36,621	9%	85,518	16%	168,586	27%
Japan	117,891	30%	169,907	32%	173,203	27%
Europe & Israel	53,661	14%	43,427	8%	93,135	15%
Korea	44,750	11%	87,861	17%	51,473	8%
Rest of Asia Pacific	74,894	19%	55,246	10%	58,751	9%
Total	\$ 396,589	100%	\$ 532,513	100%	\$ 635,783	100%

A significant portion of our revenues continues to be generated in Asia, where a substantial portion of the world's semiconductor manufacturing capacity is located, and we expect that will continue to be the case.

Gross margin

Our gross margin fluctuates with revenue levels and product mix, and is affected by variations in costs related to manufacturing and servicing our products. Our gross margin percentage was lower during the three months ended December 31, 2008 compared to the three months ended September 30, 2008 and December 31, 2007 primarily due to higher intangible assets amortization expense as a result of the acquisition of the MIE business unit at the end of the three months ended September 30, 2008, lower product and service revenues, decreased manufacturing capacity utilization, and excess inventory write-downs, driven by declines in our product build plans and service inventory usage, which are partially offset by lower bonus expense. Our near term gross margins will likely be adversely affected by lower levels of product revenues in comparison to the same periods in the prior fiscal year.

The following are costs that were recorded in the three months ended December 31, 2008 compared to the three months ended September 30, 2008:

\$29.0 million charge for excess inventory write-downs, compared to no such charges in the three months ended September 30, 2008,

\$15.7 million for amortization of intangibles, compared to \$12.8 million in the three months ended September 30, 2008,

\$8.8 million for severance and benefits related to workforce reductions, compared to no such charges in the three months ended September 30, 2008, and

(\$0.9) million credit to bonus expense, compared to \$5.5 million charge in the three months ended September 30, 2008.

The following are costs that were recorded in the three months ended December 31, 2008 compared to the three months ended December 31, 2007:

\$29.0 million charge for excess inventory write-downs, compared to \$7.1 million in the three months ended December 31, 2007,

\$15.7 million for amortization of intangibles, compared to \$6.3 million in the three months ended December 31, 2007,

Edgar Filing: KLA TENCOR CORP - Form 10-Q

\$8.8 million for severance and benefits related to workforce reductions, compared to \$1.2 million in the three months ended December 31, 2007,

\$0.9 million recorded for inventory write-offs related to discontinued products, compared to a \$3.1 million charge recorded in the three months ended December 31, 2007, and

(\$0.9) million credit to bonus expense, compared to \$5.1 million charge in the three months ended December 31, 2007.

Our gross margin during the six months ended December 31, 2008 was lower compared to gross margin for the corresponding period of fiscal year 2008 due to higher intangible assets amortization expense as a result of the acquisition of ICOS and the MIE business unit, lower product and service revenues, decreased manufacturing capacity utilization, and excess inventory write-downs, driven by declines in our product build plans and service inventory usage, which are partially offset by lower bonus expense.

The following are costs that were recorded in the six months ended December 31, 2008 compared to the six months ended December 31, 2007:

\$29.0 million charge for excess inventory write-downs, compared to \$7.9 million in the six months ended December 31, 2007,

\$28.5 million for amortization of intangibles, compared to \$16.3 million in the six months ended December 31, 2007,

Table of Contents

\$8.5 million for severance and benefits related to workforce reductions, compared to \$2.0 million in the six months ended December 31, 2007,

\$0.9 million recorded for inventory write-offs related to discontinued products, compared to a \$3.1 million charge recorded in the six months ended December 31, 2007, and

\$4.6 million of bonus expense, compared to \$11.7 million in the six months ended December 31, 2007.

Backlog

Our backlog for system shipments and associated warranty totaled \$451 million and \$715 million as of December 31, 2008 and June 30, 2008, respectively, and includes sales orders where written customer requests have been received and the delivery is anticipated within the next 12 months. We make backlog adjustments for backlog obtained from acquired companies, cancellations, customer delivery date changes and currency adjustments. Orders for service contracts and unreleased products are excluded from backlog. All orders are subject to cancellation or delay by the customer, with limited or no penalties.

Due to possible customer changes in delivery schedules, delays or cancellation of orders and as some orders are received and shipped within the same quarter, our backlog at any particular date is not necessarily indicative of business volumes or actual sales for any succeeding periods. Our backlog is not subject to our normal accounting controls for information that is either reported in or derived from our basic financial statements. The concept of backlog is not defined in the accounting literature, making comparisons between periods and with other companies difficult and potentially misleading.

Engineering, Research and Development (R&D)

(Dollar amounts in thousands)	Three months ended			Q2 FY09 vs. Q1 FY09	Q2 FY09 vs. Q2 FY08
	December 31, 2008	September 30, 2008	December 31, 2007		
R&D expenses	\$ 95,266	\$ 114,361	\$ 97,513	\$(19,095) -17%	\$(2,247) -2%
Stock-based compensation expense included in R&D expenses	\$ 6,981	\$ 9,972	\$ 7,109	\$(2,991) -30%	\$(128) -2%
R&D expenses as a percentage of total revenues	24%	21%	15%		

(Dollar amounts in thousands)	Six months ended		Q2 FY09 vs. Q2 FY08
	December 31, 2008	December 31, 2007	
R&D expenses	\$ 209,627	\$ 196,857	\$ 12,770 6%
Stock-based compensation expense included in R&D expenses	\$ 16,953	\$ 15,701	\$ 1,252 8%
R&D expenses as a percentage of total revenues	23%	15%	

R&D expenses during the three months ended December 31, 2008 decreased compared to the three months ended September 30, 2008 and December 31, 2007. The decrease is primarily attributable to lower in-process R&D (IPR&D) charges, lower stock-based compensation expense, lower bonus expense and reduced R&D spending during the three months ended December 31, 2008, partially offset by additional R&D spending as a result of the recent acquisitions of ICOS and the MIE business unit and higher severance charges during such period related to the global workforce reduction that we announced in November 2008.

The following are expenses that were recorded in the three months ended December 31, 2008 compared to the three months ended September 30, 2008:

\$7.0 million for stock-based compensation expense, compared to \$10.0 million during the three months ended September 30, 2008,

\$4.4 million for severance and benefits related to workforce reductions, compared to no such charges in the three months ended September 30, 2008,

Edgar Filing: KLA TENCOR CORP - Form 10-Q

\$1.6 million for amortization of intangibles, compared to \$1.4 million during the three months ended September 30, 2008,

No IPR&D charges related to a business acquisition, compared to \$8.6 million in the three months ended September 30, 2008, and

(\$1.8) million credit to bonus expense, compared to \$3.8 million charge in the three months ended September 30, 2008.

Table of Contents

The following are expenses that were recorded in the three months ended December 31, 2008 compared to the three months ended December 31, 2007:

\$7.0 million for stock-based compensation expense, compared to \$7.1 million during the three months ended December 31, 2007,

\$4.4 million for severance and benefits related to workforce reductions, compared to \$0.4 million in the three months ended December 31, 2007,

\$1.6 million for amortization of intangibles, compared to \$0.2 million during the three months ended December 31, 2007,

No IPR&D charges related to a business acquisition, compared to \$4.0 million in the three months ended December 31, 2007, and

(\$1.8) million credit to bonus expense, compared to \$4.1 million charge in the three months ended December 31, 2007. The increase in R&D expenses during the six months ended December 31, 2008 compared to the six months ended December 31, 2007 was primarily due to higher one-time charges recorded during the six months ended December 31, 2008 plus additional R&D spending as a result of the recent acquisitions of ICOS and the MIE business unit, which are offset by lower bonus expense.

The following are expenses that were recorded in the six months ended December 31, 2008 compared to the six months ended December 31, 2007:

\$17.0 million for stock-based compensation expense, compared to \$15.7 million during the six months ended December 31, 2007,

\$8.6 million for IPR&D charges related to a business acquisition, compared to \$4.0 million in the six months ended December 31, 2007,

\$4.1 million for severance and benefits related to workforce reductions, compared to \$0.5 million in the six months ended December 31, 2007,

\$3.0 million for amortization of intangibles, compared to \$0.4 million during the six months ended December 31, 2007, and

\$2.0 million of bonus expense, compared to \$10.1 million in the six months ended December 31, 2007. R&D expenses include the benefit of \$7.0 million, \$3.6 million and \$4.0 million of external funding received during the three months ended December 31, 2008, September 30, 2008 and December 31, 2007, respectively, for certain strategic development programs from government grants.

Our future operating results will depend significantly on our ability to produce products and provide services that have a competitive advantage in our marketplace. To do this, we believe that we must continue to make substantial investments in our research and development. We remain committed to product development in new and emerging technologies as we address the yield challenges our customers face at future technology nodes.

Selling, General and Administrative (SG&A)

Edgar Filing: KLA TENCOR CORP - Form 10-Q

(Dollar amounts in thousands)	Three months ended			Q2 FY09 vs.		Q2 FY09 vs.	
	December 31, 2008	September 30, 2008	December 31, 2007	Q1 FY09	13%	Q2 FY08	-16%
SG&A expenses	\$ 133,954	\$ 118,490	\$ 159,453	\$ 15,464	13%	\$ (25,499)	-16%

SG&A expenses as a percentage of total revenues	34%	22%	25%				

Table of Contents

(Dollar amounts in thousands)	Six months ended			Q2 FY09 vs. Q2 FY08
	December 31, 2008	December 31, 2007		
SG&A expenses	\$ 252,444	\$ 269,958	\$ (17,514)	-6%
Stock-based compensation expense included in SG&A expenses	\$ 29,597	\$ 24,681	\$ 4,916	20%
SG&A expenses as a percentage of total revenues	27%	20%		

SG&A expenses during the three months ended December 31, 2008 increased compared to the three months ended September 30, 2008.

The following are expenses that were recorded in the three months ended December 31, 2008 compared to the three months ended September 30, 2008:

\$23.9 million for bad debt expense, compared to no such charges during the three months ended September 30, 2008,

\$10.6 million for stock-based compensation expense, compared to \$14.3 million during the three months ended September 30, 2008,

\$9.2 million for expenses related to the shareholder class action litigation relating to the Company's historical stock option practices, compared to \$3.8 million during the three months ended September 30, 2008,

\$8.6 million for severance and benefits related to workforce reductions, compared to \$5.8 million during the three months ended September 30, 2008,

\$5.8 million for amortization of intangibles, compared to \$5.5 million during the three months ended September 30, 2008,

\$2.0 million in net gains recorded on the sale of real estate assets, compared to \$1.4 million recorded in the three months ended September 30, 2008, and

\$1.7 million for bonus expense, compared to \$7.6 million in the three months ended September 30, 2008.

The SG&A expenses during the three months ended December 31, 2008 were lower compared to the three months ended December 31, 2007 primarily due to lower expenses related to the shareholder class action litigation relating to the Company's historical stock option practices and lower bonus expense, which are partially offset by higher intangible assets amortization expense as a result of our acquisitions of ICOS and the MIE business unit, severance charges related to workforce reductions, additional bad debt expense and lower gain on sale of real estate assets.

The following are expenses that were recorded in the three months ended December 31, 2008 compared to the three months ended December 31, 2007:

\$23.9 million for bad debt expense, compared to no such charges during the three months ended December 31, 2007,

\$9.2 million for expenses related to the shareholder class action litigation relating to the Company's historical stock option practices, compared to \$67.0 million during the three months ended December 31, 2007,

\$10.6 million for stock-based compensation expense, compared to \$11.4 million during the three months ended December 31, 2007,

Edgar Filing: KLA TENCOR CORP - Form 10-Q

\$8.6 million for severance and benefits related to workforce reductions, compared to \$1.4 million during the three months ended December 31, 2007,

\$5.8 million for amortization of intangibles, compared to \$2.1 million during the three months ended December 31, 2007,

Table of Contents

\$2.0 million in net gains recorded on the sale of real estate assets, compared to \$9.0 million recorded in the three months ended December 31, 2007, and

\$1.7 million for bonus expense, compared to \$10.0 million in the three months ended December 31, 2007.

SG&A expenses during the six months ended December 31, 2008 were lower compared to the six months ended December 31, 2007 primarily due to lower expenses related to the shareholder class action litigation relating to the Company's historical stock option practices and lower bonus expense, which are partially offset by higher intangible assets amortization expense as a result of our acquisitions of ICOS and the MIE business unit, severance charges related to workforce reductions, severance charges of \$6.3 million related to the severance and consulting agreement that we entered into with John H. Kispert recorded in the six months ended December 31, 2008, additional bad debt expense and lower gain on sale of real estate assets.

The following are expenses that were recorded in the six months ended December 31, 2008 compared to the six months ended December 31, 2007:

\$13.0 million for expenses related to the shareholder class action litigation relating to the Company's historical stock option practices, compared to \$69.1 million during the six months ended December 31, 2007,

\$23.9 million for bad debt expense, compared to no such charges during the six months ended December 31, 2007,

\$11.3 million for amortization of intangibles, compared to \$4.3 million during the six months ended December 31, 2007,

\$14.4 million for severance and benefits related to workforce reductions, compared to \$2.8 million during the six months ended December 31, 2007,

\$3.4 million in net gains recorded on the sale of real estate assets, compared to \$9.0 million recorded in the six months ended December 31, 2007, and

\$9.3 million of bonus expense, compared to \$21.3 million in the six months ended December 31, 2007.

SG&A expenses during the three months ended December 31, 2008 includes \$23.9 million of bad debt expense for potential losses relating to heightened risk of non-payment of accounts receivable by customers facing financial difficulty.

Impairment of Goodwill and Purchased Intangible Assets

For the three months ended December 31, 2008, we performed our annual evaluation of goodwill by reporting unit, and concluded that the carrying value of our Metrology reporting unit exceeded its estimated fair value. As a result of the global economic downturn, reductions to our revenue and operating forecasts and a significant reduction in our market capitalization, we determined that the goodwill related to our Metrology reporting unit was fully impaired. As a result, we recorded a goodwill impairment charge of \$272.1 million during the three months ended December 31, 2008.

As a result of the aforementioned impairment indicators and in accordance with SFAS No. 144, we performed an analysis utilizing discounted future cash flows related to the long-lived and intangible assets to determine the fair value of each of our asset groups. Based on the assessment, we recorded an intangible asset impairment charge of \$162.8 million related to existing technology, patents, customer relationships, and trademarks as well as an additional \$2.0 million related to long-lived assets during the three months ended December 31, 2008.

Restructuring Charges

In November 2008, we announced a plan to reduce our global workforce by approximately 15% by June 30, 2009. This reduction is one of many cost-reduction actions that we are taking in an effort to lower our quarterly operating expense run rate by the end of fiscal year 2009 in response to the current demand environment. The program in the United States is accounted for in accordance with SFAS

Edgar Filing: KLA TENCOR CORP - Form 10-Q

No. 112, *Employers Accounting for Postemployment Benefits an amendment of Financial Accounting Standards Board Statements No. 5 and 43*, whereas the programs in the international locations are accounted for in accordance with SFAS No. 5, *Accounting for Contingencies*. We expect to recognize estimated annual cost savings of \$75 million as a result of the reduction in workforce. During the three months ended December 31, 2008, we recorded a \$21.8 million net restructuring charge, of which \$8.8 million was recorded to costs of revenues, \$4.4 million to engineering, research and development expense and \$8.6 million to selling, general and administrative expense. This charge represents the estimated minimum liability associated with expected termination benefits to be provided to employees after employment. We anticipate incurring additional severance costs and other related expenses in connection with the workforce reduction at least through the remainder of fiscal year 2009. In addition, we are currently in the process of evaluating additional restructuring activities which, if implemented, may result in additional restructuring charges.

Table of Contents

The following table shows the activity primarily related to severance and benefits expense for the three months ended December 31, 2008:

(in thousands)	Three months ended December 31, 2008
Balance as of September 30, 2008	\$ 1,333
Restructuring costs	23,142
Reversals	(1,333)
Cash payments	(4,435)
 Balance as of December 31, 2008	 \$ 18,707

Substantially all of the restructuring charges related to our workforce reduction announced in November 2008 are expected to be paid out during the fiscal year ending June 30, 2009.

Interest Income and Other, Net and Interest Expense

(Dollar amounts in thousands)	December 31, 2008	Three months ended	
		September 30, 2008	December 31, 2007
Interest income and other, net	\$ 1,381	\$ 18,050	\$ 13,856
Interest expense	\$ 13,853	\$ 13,873	\$ 587
Interest income and other, net as a percentage of total revenues	0%	3%	2%
Interest expense as a percentage of total revenues	4%	3%	0%

(Dollar amounts in thousands)	Six months ended	
	December 31, 2008	December 31, 2007
Interest income and other, net	\$ 19,431	\$ 31,715
Interest expense	\$ 27,726	\$ 972
Interest income and other, net as a percentage of total revenues	2%	2%
Interest expense as a percentage of total revenues	3%	0%

Interest income and other, net is comprised primarily of interest income earned on our investment and cash portfolio, realized gains or losses on sales of marketable securities, as well as gains or losses recorded upon settlement of certain foreign currency contracts. The decrease in interest income and other, net during the three months ended December 31, 2008 compared to the three months ended September 30, 2008 was primarily due to a benefit of \$8.5 million that was recorded in the three months ended September 30, 2008 upon expiration of a statute of limitations relating to an uncertainty in our position with respect to a foreign transaction-based tax. No such benefit was recorded during the three months ended December 31, 2008. The decrease in interest income and other, net is also attributable to a \$3.5 million impairment of our venture investment portfolio as well as a \$3.1 million decrease in interest income from investment and cash portfolio.

Interest expense remained flat in the three months ended December 31, 2008 compared to the three months ended September 30, 2008. The increase in interest expense in the three months ended December 31, 2008 compared to the three months ended December 31, 2007 were primarily due to additional interest expense as a result of the issuance of \$750 million aggregate principal amount of senior notes in the fourth quarter of the fiscal year ended June 30, 2008.

Provision for Income Taxes

Our effective income tax rate was a tax benefit of 16.2% compared to a tax expense of 21.4% for the three months ended December 31, 2008 and December 31, 2007, respectively and a tax benefit of 13.4% compared to a tax expense of 42.9% for the six months ended December 31, 2008 and December 31, 2007, respectively.

The decrease in the ratio of tax expense over income of 21.4% for the three months ended December 31, 2007 compared to the ratio of tax benefit over loss of 16.2% for the three months ended December 31, 2008 was primarily related to the tax effect of the \$272.1 million goodwill impairment charge that is non-deductible for tax purposes for the three months ended December 31, 2008.

Edgar Filing: KLA TENCOR CORP - Form 10-Q

The decrease in the ratio of tax expense over income of 42.9% for the six months ended December 31, 2007 compared to the ratio of tax benefit over loss of 13.4% for the six months ended December 31, 2008, is primarily due to the effect of the \$46.6 million of incremental U.S. tax expense associated with the implementation of our global manufacturing strategy for the six months ended December 31, 2007 compared to the effect of the \$272.1 million goodwill impairment charge that is non-deductible for tax purposes incurred during the six months ended December 31, 2008.

Table of Contents

Our future effective income tax rate depends on various factors, such as tax legislation, the geographic composition of our pre-tax income, non tax-deductible expenses incurred in connection with acquisitions, amounts of tax-exempt interest income and research and development credits as a percentage of aggregate pre-tax income, and the effectiveness of our tax planning strategies.

In the normal course of business, we are subject to examination by taxing authorities throughout the world. We are not under United States federal income tax examination at this time. We remain subject to federal income tax examination for all years after the fiscal year ended June 30, 2004. We are subject to state income tax examinations for all years after the fiscal year ended June 30, 2003. We are also subject to examinations in major foreign jurisdictions, including Japan, Israel and Singapore, for all years after the fiscal year ended June 30, 2003 and are currently under tax examinations in various other foreign tax jurisdictions. It is reasonably possible that certain examinations may be concluded in the next twelve months. Accordingly, we believe it is reasonably possible that our existing unrecognized tax benefits may be reduced and recognized by up to \$7.7 million within the next twelve months as a result of the lapse of statutes of limitations and the resolution of agreements with various foreign tax authorities.

LIQUIDITY AND CAPITAL RESOURCES

(Dollar amounts in thousands)	December 31, 2008	June 30, 2008
Cash and cash equivalents	\$ 656,330	\$ 1,128,106
Marketable securities	566,070	451,277
Total cash, cash equivalents and marketable securities	\$ 1,222,400	\$ 1,579,383
Percentage of total assets	32%	33%
	Six months ended	
(In thousands)	December 31, 2008	December 31, 2007
Cash provided by operating activities	\$ 45,757	\$ 330,993
Cash provided by (used in) investing activities	(254,142)	234,335
Cash used in financing activities	(259,256)	(733,838)
Effect of exchange rate changes on cash and cash equivalents	(4,135)	(6,358)
Net decrease in cash and cash equivalents	\$ (471,776)	\$ (174,868)

At December 31, 2008, our cash, cash equivalents and marketable securities totaled \$1.2 billion, a decrease of \$357.0 million from June 30, 2008. We generated \$45.8 million in cash from operations and used \$254.1 million in investing activities during the six months ended December 31, 2008. We used \$259.3 million in cash for financing activities during the six months ended December 31, 2008. We used \$218.7 million for the repurchase of common stock under our share repurchase program and an additional \$141.0 million for the acquisition of the MIE business unit of Vistec Semiconductor Systems.

We have historically financed our operations through cash generated from operations. Cash provided by operating activities was \$45.8 million and \$331.0 million for the six months ended December 31, 2008 and 2007, respectively. Cash provided by operating activities during the six months ended December 31, 2008 was primarily the function of our net loss of \$415.0 million, offset by non-cash depreciation and amortization of \$78.4 million, goodwill, purchased intangible asset and long-lived asset impairment charges of \$449.2 million, stock-based compensation of \$56.7 million, provision for doubtful accounts of \$23.9 million, and a decrease in accounts receivable of \$162.5 million as collections exceeded shipments during the six months ended December 31, 2008, which in turn were offset by a decrease in deferred system profit of \$67.4 million as a result of lower shipments compared to revenue, and a net decrease in other assets and liabilities of \$234.1 million primarily due to the payment of \$65.0 million to the settlement class as a term of the settlement of the shareholder class action litigation relating to our historical stock option practices, annual bonus payout, and aggregate interest payments of \$25.7 million related to our \$750 million in outstanding long-term debt in the six months ended December 31, 2008.

Cash provided by operating activities during the six months ended December 31, 2007 consisted primarily of net income of \$172.1 million, increased by non-cash depreciation and amortization of \$53.3 million, stock-based compensation of \$51.3 million, a decrease in inventories of \$57.5 million due to lower build plan as a result of lower bookings, a decrease in accounts receivable of \$30.2 million as collections exceeded shipments during the six months ended December 31, 2007 and an increase in accounts payable of \$21.8 million primarily as a result of timing of payments. These increases in operating cash flow were partially offset by changes in other assets and liabilities of \$54.8 million primarily due to net cash outflow resulting from tax payments made and an accrual of \$65.0 million for the then-proposed settlement of the shareholder class action lawsuit made in the six months ended December 31, 2007.

Table of Contents

Investing activities typically consist of purchases and sales or maturities of marketable securities, purchases of capital assets to support long-term growth and acquisitions of technology or other companies to allow access to new markets or emerging technologies. Cash used in investing activities was \$254.1 million during the six months ended December 31, 2008, while cash provided by investing activities was \$234.3 million during the six months ended December 31, 2007.

Financing activities include dividend payments to our common stockholders and sales and repurchases of our common stock. We used \$226.5 million and \$809.8 million for the repurchases of our common stock during the six months ended December 31, 2008 and 2007, respectively.

During the three months ended December 31, 2008, we announced a plan to reduce our global workforce by approximately 15% by June 30, 2009. We expect to recognize estimated annual cost savings of \$75 million as a result of the reduction in workforce. During the three months ended December 31, 2008, we recorded a \$21.8 million net restructuring charge, of which \$4.4 million was paid out during the three months ended December 31, 2008 and the remaining balance is expected to be paid out by June 30, 2009. We anticipate incurring additional severance costs and other related expense in connection with the workforce reduction at least through the remainder of fiscal year 2009.

During the third quarter of the fiscal year ended June 30, 2005, our Board of Directors approved the initiation of a quarterly cash dividend. During the three months ended December 31, 2008, our Board of Directors declared a dividend of \$0.15 per share of our outstanding common stock, which was paid on December 1, 2008 to our stockholders of record as of November 24, 2008. During the same period in fiscal year 2008, our Board of Directors also declared and paid a quarterly cash dividend of \$0.15 per share. The total amount of dividends paid during the three months ended December 31, 2008 and 2007 were \$25.3 million and \$27.2 million, respectively.

The following is a schedule summarizing our significant obligations to make future payments under contractual obligations as of December 31, 2008:

(in thousands)	Fiscal year ending June 30,							
	Total	2009(2)	2010	2011	2012	2013	Thereafter	Other(3)
Long-term debt obligations(1)	\$ 750,000	\$	\$	\$	\$	\$	\$ 750,000	
Interest expense associated with long-term debt obligations	483,000	25,875	51,750	51,750	51,750	51,750	250,125	
Purchase commitments	83,399	65,191	17,373	835				
Non-current income tax payable	55,934							55,934
Operating leases	39,724	6,296	10,462	7,538	3,794	3,099	8,535	
Pension obligations	11,779	544	1,190	1,239	1,064	1,110	6,632	
Total contractual cash obligations	\$ 1,423,836	\$ 97,906	\$ 80,775	\$ 61,362	\$ 56,608	\$ 55,959	\$ 1,015,292	\$ 55,934

(1) In April 2008, we issued \$750 million aggregate principal amount of senior notes due in 2018.

(2) Remaining 6 months.

(3) Represents the non-current tax payable obligation under FIN 48. We are unable to make a reasonably reliable estimate of the timing of payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes.

We have agreements with financial institutions to sell certain of our trade receivables and promissory notes from customers without recourse. In addition, from time to time we will discount, without recourse, Letters of Credit (LCs) received from customers in payment of goods.

Table of Contents

The following table shows total receivables sold under factoring agreements and proceeds from sales of LCs and related discounting fees paid for the three and six months ended December 31, 2008 and 2007:

(In thousands)	Three months ended		Six months ended	
	December 31, 2008	December 31, 2007	December 31, 2008	December 31, 2007
Receivables sold under factoring agreements	\$ 76,368	\$ 84,879	\$ 158,639	\$ 155,413
Proceeds from sales of LCs	\$ 2,280	\$ 10,710	\$ 10,666	\$ 17,528
Discounting fees paid on sales of LCs (1)	\$ 6	\$ 56	\$ 44	\$ 77

(1) Discounting fees were equivalent to interest expense and were recorded in interest income and other, net.

We maintain guarantee arrangements of \$30.1 million in various locations to fund customs guarantees for VAT and LC needs of our subsidiaries in Europe and Asia. Approximately \$21.6 million was outstanding under these arrangements as of December 31, 2008.

We maintain certain open inventory purchase commitments with our suppliers to ensure a smooth and continuous supply chain for key components. Our liability under these purchase commitments is generally restricted to a forecasted time-horizon as mutually agreed upon between the parties. This forecast time-horizon can vary among different suppliers. Our open inventory purchase commitments were approximately \$83.4 million as of December 31, 2008 and are primarily due within the next 12 months. Actual expenditures will vary based upon the volume of the transactions and length of contractual service provided. In addition, the amounts paid under these arrangements may change in the event that the arrangements are renegotiated or canceled. Certain agreements provide for potential cancellation penalties.

We provide standard warranty coverage on our systems for 40 hours per week for twelve months, providing labor and parts necessary to repair the systems during the warranty period. We account for the estimated warranty cost as a charge to cost of revenues when revenue is recognized. The estimated warranty cost is based on historical product performance and field expenses. The actual product performance and/or field expense profiles may differ, and in those cases we adjust our warranty accruals accordingly. The difference between the estimated and actual warranty costs tends to be larger for new product introductions as there is limited historical product performance to estimate warranty expense; more mature products with longer product performance histories tend to be more stable in our warranty charge estimates. Non-standard warranty coverage generally includes services incremental to the standard 40-hour per week coverage for twelve months. See Note 14, Commitments and Contingencies, to the Condensed Consolidated Financial Statements for a detailed description.

Working capital decreased to \$1.8 billion as of December 31, 2008, compared to \$2.1 billion as of June 30, 2008. In October 2008, we suspended the stock repurchases in order to maintain financial flexibility in light of the deteriorating global economic and market conditions. While there are no specific significant transactions or arrangements that are likely to materially affect liquidity, economic uncertainty and weak credit markets are driving our customers to delay their procurement as well as payment decisions which could adversely delay and affect our cash collections. As of December 31, 2008, our principal sources of liquidity consisted of \$1.2 billion of cash, cash equivalents, and marketable securities. Cash balances are held throughout the world, including significant amounts held outside of the United States. The majority of the amounts held outside of the United States could be repatriated to the United States, but under current law, would be subject to U.S. federal income taxes, less applicable foreign tax credits. Our liquidity is affected by many factors, some of which are based on the normal ongoing operations of the business, and others of which relate to the uncertainties of global economies and the semiconductor and the semiconductor equipment industries. Although cash requirements will fluctuate based on the timing and extent of these factors, we believe that cash generated from operations, together with the liquidity provided by existing cash and cash equivalent balances, will be sufficient to satisfy our liquidity requirements for at least the next twelve months.

Our investment portfolio includes auction rate securities, which are investments with contractual maturities generally between 20 to 30 years. They are usually found in the form of municipal bonds, preferred stock, a pool of student loans, or collateralized debt obligations whose interest rates are reset. The reset typically occurs every seven to forty-nine days, through an auction process. At the end of each reset period, investors can sell or continue to hold the securities at par. The auction rate securities held by us are backed by student loans and are collateralized, insured and guaranteed by the United States Federal Department of Education. In addition, all auction rate securities held by us are rated by the major independent rating agencies as either AAA or Aaa. In February 2008, auctions failed for approximately \$48.2 million in par value of municipal auction rate securities that we held because sell orders exceeded buy orders. These failures are not believed to be a credit issue, but rather caused by a lack of liquidity. The funds associated with these failed auctions may not be accessible until the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process, or the security matures. As a result, we have classified these securities with failed auctions as long-term assets in our condensed consolidated balance sheet. Prior to the three months ended December 31, 2008, a total of \$5.6 million of the auction rate securities with a net book value of \$5.4 million were called at par by the issuer; therefore no losses were recognized on these

Edgar Filing: KLA TENCOR CORP - Form 10-Q

securities. During the three months ended December 31, 2008, an additional \$1.6 million of the auction rate securities with a net book value of \$1.3 million was called at par by the issuer; therefore no losses were recognized on these securities during the three months ended December 31, 2008. The fair value of our auction rate securities at December 31, 2008 was \$34.5 million.

Table of Contents

By letter dated August 8, 2008, we received notification from UBS AG (UBS), issued in connection with a settlement entered into between UBS and certain regulatory agencies, offering to repurchase all of our auction rate security holdings at par value. We formally accepted the settlement offer and entered into a repurchase agreement (Agreement) with UBS on November 11, 2008 (Acceptance Date). By accepting the Agreement, we (1) received the right (Put Option) to sell our auction rate securities at par value to UBS between June 30, 2010 and July 2, 2012 and (2) gave UBS the right to purchase the auction rate securities from us any time after the Acceptance Date as long as we receive the par value.

We expect to sell the auction rate securities under the Put Option. However, if the Put Option is not exercised before July 2, 2012, it will expire and UBS will have no further rights or obligation to buy the auction rate securities.

UBS's obligations under the Put Option are not secured by its assets and do not require UBS to obtain any financing to support its performance obligations under the Put Option. UBS has disclaimed any assurance that it will have sufficient financial resources to satisfy its obligations under the Put Option.

The Agreement covers \$41.2 million par value (fair value of \$34.5 million) of the auction rate securities held by us as of December 31, 2008. We have accounted for the Put Option as a freestanding financial instrument and elected to record the value under the fair value option of SFAS No. 159. As a result, \$6.4 million was recorded as a credit to interest income and other, net for the fair value of the Put Option. Simultaneously, we made an election pursuant to SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, to transfer these auction rate securities from available-for-sale to trading securities. The transfer to trading securities reflects our intent to exercise the Put Option during the period June 30, 2010 to July 2, 2012. Prior to entering into the Agreement, our intent was to hold the auction rate securities until the market recovered. At the time of transfer, the unrealized loss on the auction rate securities was \$1.3 million. Prior to the transfer, this unrealized loss had been included in accumulated other comprehensive income (loss). Upon transfer of the auction rate securities to trading securities, we immediately recognized an unrealized loss of \$1.3 million, included in interest income and other, net, for the amount of the unrealized loss not previously recognized in earnings. Subsequently, we recognized an additional decline in fair value of \$5.4 million for a total unrealized loss of \$6.7 million, included in interest income and other, net, in the condensed consolidated statements of operations for the three months ended December 31, 2008. We expect that the future changes in the fair value of the Put Option will be largely offset by the fair value movements in the auction rate securities. We estimated the fair value of the auction rate securities using a discounted cash flow model incorporating assumptions that market participants would use in their estimates of fair value. Some of these assumptions include estimates for interest rates, timing and amount of cash flows and expected holding periods of the auction rate securities. We estimated the fair value of the Put Option using the expected value that we will receive from UBS which was calculated as the difference between the anticipated recognized losses and par value of the auction rate securities as of the option exercise date. This value was discounted by using UBS's credit default swap rate to account for the credit considerations of the counterparty risk. We will reassess the fair value in future reporting periods based on several factors, including continued failure of auctions, failure of investments to be redeemed, deterioration of credit ratings of investments, market risk and other factors. Based on our expected operating cash flows and other sources of cash, we do not believe that any reduction in liquidity of our auction rate securities will have a material impact on our overall ability to meet our liquidity needs.

Our credit ratings and outlooks as of January 27, 2009 are summarized below.

Rating Agency	Rating	Outlook
Fitch	BBB	Negative
Moody's	Baa1	Stable
Standard & Poor's	BBB	Negative

Factors that can affect our credit ratings include changes in our operating performance, the economic environment, conditions in the semiconductor and semiconductor equipment industries, our financial position, and changes in our business strategy.

Table of Contents**Off-Balance Sheet Arrangements**

Under our foreign-currency risk management strategy, we utilize derivative instruments to protect our interests from unanticipated fluctuations in earnings and cash flows caused by volatility in currency exchange rates. This financial exposure is monitored and managed as an integral part of our overall risk management program which focuses on the unpredictability of financial markets and seeks to reduce the potentially adverse effects that the volatility of these markets may have on our operating results. We continue our policy of hedging our current and forecasted foreign currency exposures with hedging instruments having tenors of up to 18 months. The outstanding hedge contracts, with maximum maturity of 13 months, were as follows:

(In thousands)	As of December 31, 2008	As of June 30, 2008
Cash flow hedge contracts		
Purchase	\$ 3,030	\$ 7,413
Sell	(89,697)	(200,676)
Other foreign currency hedge contracts		
Purchase	129,146	1,278,395
Sell	(235,854)	(1,402,119)
Net	\$ (193,375)	\$ (316,987)

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to financial market risks, including changes in interest rates and foreign currency exchange rates. To mitigate these risks, we utilize derivative financial instruments, such as foreign currency hedges. We do not use derivative financial instruments for speculative or trading purposes. All of the potential changes noted below are based on sensitivity analyses performed on our financial position as of December 31, 2008. Actual results may differ materially.

As of December 31, 2008, we had an investment portfolio of fixed income securities of approximately \$566.1 million, excluding those classified as cash and cash equivalents. These securities, as with all fixed income instruments, are subject to interest rate risk and will fall in value if market interest rates increase. If market interest rates were to increase immediately and uniformly by 10% from levels as of December 31, 2008, the fair value of the portfolio would have declined by \$1.3 million.

As of December 31, 2008, we had net forward contracts to sell \$193.4 million in foreign currency in order to hedge currency exposures (see Note 16, Derivative Instruments and Hedging Activities, to the Condensed Consolidated Financial Statements for a detailed description). If we had entered into these contracts on December 31, 2008, the U.S. dollar equivalent would have been \$202.8 million. A 10% adverse move in all currency exchange rates affecting the contracts would decrease the fair value of the contracts by \$32.9 million. However, if this occurred, the fair value of the underlying exposures hedged by the contracts would increase by a similar amount. Accordingly, we believe that the hedging of our foreign currency exposure should have no material impact on net loss or cash flows.

See Note 4, Marketable Securities, to the Condensed Consolidated Financial Statements in Part I, Item 1; Management's Discussion and Analysis of Financial Condition and Results of Operations, *Liquidity and Capital Resources*, in Part I, Item 2; and Risk Factors in Part II, Item 1A of this Quarterly Report on Form 10-Q for a description of recent market events that may affect the value of the investments in our portfolio and the liquidity of certain auction rate securities that we held at December 31, 2008.

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures and Related CEO and CFO Certifications***Evaluation of Disclosure Controls and Procedures*

The Company conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in the Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) (Disclosure Controls) as of the end of the period covered by this Quarterly Report on Form 10-Q (this Report) required by Exchange Act Rules 13a-15(b) or 15d-15b. The controls evaluation was conducted under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO).

Edgar Filing: KLA TENCOR CORP - Form 10-Q

Based on this evaluation, the CEO and CFO have concluded that as of the end of the period covered by this Report the Company's disclosure controls and procedures were effective at a reasonable assurance level.

Attached as exhibits to this Report are certifications of the CEO and CFO, which are required in accordance with Rule 13a-14 of the Exchange Act. This Controls and Procedures section includes the information concerning the controls evaluation referred to in the certifications, and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

Table of Contents*Definition of Disclosure Controls*

Disclosure Controls are controls and procedures designed to reasonably assure that information required to be disclosed in the Company's reports filed under the Exchange Act, such as this Report, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure Controls are also designed to reasonably assure that such information is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. The Company's Disclosure Controls include components of its internal control over financial reporting, which consists of control processes designed to provide reasonable assurance regarding the reliability of its financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles in the United States. To the extent that components of the Company's internal control over financial reporting are included within its Disclosure Controls, they are included in the scope of the Company's annual controls evaluation.

Limitations on the Effectiveness of Controls

The Company's management, including the CEO and CFO, does not expect that the Company's disclosure controls or internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

There were no changes in the Company's internal control over financial reporting that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

The information set forth above under Note 13, "Litigation and Other Legal Matters," to the Condensed Consolidated Financial Statements in Item 1 of Part 1 is incorporated herein by reference.

ITEM 1A. RISK FACTORS**Risks Associated with Our Industry and Market Conditions**

The semiconductor equipment industry is highly cyclical. The purchasing decisions of our customers are highly dependent on the economies of both the local markets in which they are located and the semiconductor industry worldwide. If we fail to respond to industry cycles, our business could be seriously harmed.

The timing, length and severity of the up-and-down cycles in the semiconductor equipment industry are difficult to predict. This cyclical nature of the industry in which we operate affects our ability to accurately predict future revenue, and in some cases, future expense levels. In the current environment, our ability to accurately predict our future operating results is particularly limited. During down cycles in our industry, the financial results of our customers may be negatively impacted, which could result not only in a decrease in, or cancellation or delay of, orders (which are generally subject to cancellation or delay by the customer with limited or no penalty) but also a weakening of their financial condition that could impair their ability to pay for our products or our ability to recognize revenue from certain customers. When cyclical fluctuations result in lower than expected revenue levels, operating results may be adversely affected and cost reduction measures may be necessary in order for us to remain competitive and financially sound. During periods of declining revenues, such as in the current environment, we must be in a position to adjust our cost and expense structure to prevailing market conditions and to continue to motivate and retain our key employees. If we fail to respond, or if our attempts to respond (such as the global workforce reduction and cost-reduction efforts that we announced in November 2008) fail to accomplish our intended results, then our business could be seriously harmed. Furthermore, any workforce reductions and cost-reduction actions that we adopt in response to down cycles may result in additional restructuring charges, disruptions in our

Edgar Filing: KLA TENCOR CORP - Form 10-Q

operations and loss of key personnel. In addition, during periods of rapid growth, we must be able to increase manufacturing capacity and personnel to meet customer demand. We can provide no assurance that these objectives can be met in a timely manner in response to industry cycles. Each of these factors could adversely impact our operating results and financial condition.

We are exposed to risks associated with the ongoing financial crisis and weakening global economy.

The recent severe tightening of the credit markets, turmoil in the financial markets and weakening global economy are contributing to slowdowns in the industries in which we operate, which slowdowns are expected to worsen if these economic conditions are prolonged or deteriorate further.

Table of Contents

The markets for semiconductors, and therefore our business, are ultimately driven by the global demand for electronic devices by consumers and businesses. Economic uncertainty frequently leads to reduced consumer and business spending, which, in the current economic slowdown, has caused our customers to decrease, cancel or delay their equipment and service orders from us. In addition, the recent tightening of credit markets and concerns regarding the availability of credit have made it more difficult for our customers to raise capital, whether debt or equity, to finance their purchases of capital equipment, including the products we sell. Reduced demand, combined with delays in our customers' ability to obtain financing (or the unavailability of such financing), has adversely affected our product and service sales and revenues and therefore has harmed our business and operating results, and our operating results and financial condition may be further adversely impacted if the current economic conditions persist.

Furthermore, a continuing decline in the condition of the global financial markets could adversely impact the market values or liquidity of our investments. Our investment portfolio includes corporate and government securities, auction rate securities, money market funds and other types of debt and equity investments. Although we believe our portfolio continues to be comprised of sound investments due to the quality and (where applicable) credit ratings and government guarantees of the underlying investments, a further decline in the capital and financial markets would adversely impact the market values of our investments and their liquidity. If the market value of such investments were to decline, or if we were to have to sell some of our investments under illiquid market conditions, we may be required to recognize an impairment charge on such investments or a loss on such sales, either of which could have an adverse effect on our financial condition and operating results.

If we are unable to timely and appropriately adapt to changes resulting from the difficult macroeconomic environment, our business, financial condition or results of operations may be materially and adversely affected.

Our future performance depends, in part, upon our ability to continue to compete successfully worldwide.

Our industry includes large manufacturers with substantial resources to support customers worldwide. Some of our competitors are diversified companies with greater financial resources and more extensive research, engineering, manufacturing, marketing and customer service and support capabilities than we possess. We face competition from companies whose strategy is to provide a broad array of products and services, some of which compete with the products and services that we offer. These competitors may bundle their products in a manner that may discourage customers from purchasing our products, including pricing such competitive tools significantly below our product offerings. In addition, we face competition from smaller emerging semiconductor equipment companies whose strategy is to provide a portion of the products and services that we offer, using innovative technology to sell products into specialized markets. Loss of competitive position could negatively affect our prices, customer orders, revenue, gross margins, and market share, any of which would negatively affect our operating results and financial condition.

We have recorded significant restructuring, inventory write-off and asset impairment charges in the past and may do so again in the future, which could have a material negative impact on our business.

During the three months ended December 31, 2008, we recorded material restructuring charges related to our global workforce reduction, large excess inventory write-offs, and material impairment charges related to our goodwill and purchased intangible assets. If the current challenging economic conditions persist, we may implement additional cost-reduction actions, which would require us to take additional, potentially material, restructuring charges related to, among other things, employee terminations or exit costs. We may also be required to write off additional inventory if our product build plans or usage of service inventory experience further declines, and such additional write-offs could constitute material charges. In addition, a further decline in our stock price or significant adverse change in market conditions could require us to take an additional material impairment charge related to our goodwill and purchased intangible assets. Goodwill represents the excess of costs over the net fair value of net assets acquired in a business combination. Goodwill is not amortized, but is instead tested for impairment at least annually in accordance with the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets*. Purchased intangible assets with estimable useful lives are amortized over their respective estimated useful lives using the straight-line method, and are reviewed for impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*. The valuation of goodwill and intangible assets require assumptions and estimates of many critical factors, including revenue and market growth, operating cash flows, market multiples, and discount rates. We recorded a material charge during the quarter ended December 31, 2008 related to the impairment of our goodwill and purchased intangible assets. A further decline in our stock price, or any other adverse change in market conditions, particularly if such change has the effect of changing one of the critical assumptions or estimates we used to calculate the amount of such impairment charge, could result in a change to the estimation of fair value that could result in an additional impairment charge. Any such additional material charges, whether related to restructuring or goodwill or purchased intangible asset impairment, may have a material negative impact on our operating results and related financial statements.

We are exposed to risks associated with a highly concentrated customer base.

Our customer base, particularly in the semiconductor industry, historically has been, and is becoming increasingly, highly concentrated. In this environment, orders from a relatively limited number of manufacturers have accounted for, and are expected to continue to account for, a substantial portion of our sales. In addition, the mix and type of customers, and sales to any single customer,

Table of Contents

may vary significantly from quarter to quarter and from year to year. If customers do not place orders, or they delay or cancel orders, we may not be able to replace the business. Furthermore, because our products are configured to customer specifications, any changes, delays or cancellations of orders may result in significant, non-recoverable costs. Major customers may also seek, and on occasion receive, pricing, payment, intellectual property-related, or other commercial terms that are less favorable to us. Also, certain customers have undergone significant ownership changes, experienced management changes or have outsourced manufacturing activities, any of which may result in additional complexities in managing customer relationships and transactions. In the current challenging economic environment, we are exposed to additional risks related to the continued financial viability of certain of our customers. For instance, during the three months ended December 31, 2008, we increased our allowance for doubtful accounts by \$23.9 million for potential losses relating to a heightened risk of non-payment of accounts receivable by customers facing financial difficulty. Customers with liquidity issues may be forced to discontinue operations or may be acquired by one of our customers, and in either case such event would have the effect of further consolidating our customer base. In addition, to the extent our customers experience liquidity issues, we may be required to incur additional bad debt expense with respect to receivables owed to us by those customers. These factors could have a material adverse effect on our business, financial condition and operating results.

A majority of our annual revenue is derived from outside the United States, and we expect that international revenue will continue to represent a substantial percentage of our revenue. A protracted economic slowdown in any of the countries in which we do business may adversely affect our business and results of operations.

A majority of our annual revenue is derived from outside the United States, and we expect that international revenue will continue to represent a substantial percentage of our revenue. Our international revenue and operations are affected by economic conditions specific to each country and region. Because of our significant dependence on international revenue, a decline in the economies of any of the countries or regions in which we do business could negatively affect our operating results. Managing global operations and sites located throughout the world presents challenges associated with, among other things, cultural diversity and organizational alignment. Moreover, each region in the global semiconductor equipment market exhibits unique characteristics that can cause capital equipment investment patterns to vary significantly from period to period. Periodic local or international economic downturns, trade balance issues, political instability, legal or regulatory changes or terrorism in regions where we have operations, along with fluctuations in interest and currency exchange rates, could negatively affect our business and results of operations. Although we attempt to manage near-term currency risks through the use of hedging instruments, there can be no assurance that such efforts will be adequate.

Risks Related to Our Business

If we do not develop and introduce new products and technologies in a timely manner in response to changing market conditions or customer requirements, our business could be seriously harmed.

Success in the semiconductor equipment industry depends, in part, on continual improvement of existing technologies and rapid innovation of new solutions. For example, the size of semiconductor devices continues to shrink and the industry is currently transitioning to the use of new materials and innovative fab processes. While we expect these trends will increase our customers reliance on our diagnostic products, we cannot be sure that they will directly improve our business. These and other evolving customer needs require us to respond with continued development programs and to cut back or discontinue older programs, which may no longer have industry-wide support. Technical innovations are inherently complex and require long development cycles and appropriate staffing of highly qualified employees. Our competitive advantage and future business success depend on our ability to accurately predict evolving industry standards, to develop and introduce new products that successfully address changing customer needs, to win market acceptance of these new products and to manufacture these new products in a timely and cost-effective manner.

In this environment, we must continue to make significant investments in research and development in order to enhance the performance, features and functionality of our products, to keep pace with competitive products and to satisfy customer demands. Substantial research and development costs typically are incurred before we confirm the technical feasibility and commercial viability of a new product, and not all development activities result in commercially viable products. There can be no assurance that revenue from future products or product enhancements will be sufficient to recover the development costs associated with such products or enhancements. In addition, we cannot be sure that these products or enhancements will receive market acceptance or that we will be able to sell these products at prices that are favorable to us. Our business will be seriously harmed if we are unable to sell our products at favorable prices or if the market in which we operate does not accept our products.

Our business would be harmed if we do not receive sufficient parts to meet our production requirements in a timely and cost-effective manner.

We use a wide range of materials in the production of our products, including custom electronic and mechanical components, and we use numerous suppliers to supply these materials. We generally do not have guaranteed supply arrangements with our suppliers. Because of the variability and uniqueness of customers' orders, we do not maintain an extensive inventory of materials for manufacturing. We seek to minimize the risk of production and service interruptions and/or shortages of key parts by selecting and qualifying alternative suppliers for key parts, monitoring the financial stability of key suppliers and maintaining appropriate

Table of Contents

inventories of key parts. Although we make reasonable efforts to ensure that parts are available from multiple suppliers, key parts may be available only from a single supplier or a limited group of suppliers. In addition, if certain of our key suppliers experience liquidity issues and are forced to discontinue operations, which is a heightened risk during the current economic downturn, that would affect their ability to deliver parts and could result in delays for our products. Our operating results and business may be adversely impacted if we are unable to obtain parts to meet our production requirements, or if we are only able to do so on unfavorable terms.

Disruption of our manufacturing facilities due to earthquake, flood, other natural catastrophic events or terrorism could result in cancellation of orders or loss of customers and could seriously harm our business.

We have significant manufacturing operations in the United States, with additional operations in Israel, Singapore, Belgium, Germany and China. Operations at our manufacturing facilities and our assembly subcontractors are subject to disruption for a variety of reasons, including work stoppages, acts of war, terrorism, fire, earthquake, energy shortages, flooding or other natural disasters. Such disruption could cause delays in shipments of products to our customers. We cannot ensure that alternate production capacity would be available if a major disruption were to occur or that, if it were available, it could be obtained on favorable terms.

We outsource a number of services to third-party service providers, which decreases our control over the performance of these functions. Disruptions or delays at our third-party service providers could adversely impact our operations.

We outsource a number of services, including our transportation and logistics management of spare parts, to domestic and overseas third-party service providers. While outsourcing arrangements may lower our cost of operations, they also reduce our direct control over the services rendered. It is uncertain what effect such diminished control will have on the quality or quantity of products delivered or services rendered, or our ability to quickly respond to changing market conditions. Disruptions or delays at our third-party service providers due to events such as regional economic, business, environmental or political events, information technology system failures or military actions could adversely impact our operations and our ability to ship products, manage our product inventory or record and report financial and management information on a timely and accurate basis.

Our success is dependent in part on our technology and other proprietary rights. If we are unable to maintain our lead or protect our proprietary technology, we may lose valuable assets and market share.

Our success is dependent in part on our technology and other proprietary rights. We own various United States and international patents and have additional pending patent applications relating to some of our products and technologies. The process of seeking patent protection is lengthy and expensive, and we cannot be certain that pending or future applications will actually result in issued patents or that issued patents will be of sufficient scope or strength to provide meaningful protection or commercial advantage to us. Other companies and individuals, including our larger competitors, may develop technologies and obtain patents relating to our business that are similar or superior to our technology or may design around the patents we own, adversely affecting our business.

We also maintain trademarks on certain of our products and services and claim copyright protection for certain proprietary software and documentation. However, we can give no assurance that our trademarks and copyrights will be upheld or successfully deter infringement by third parties.

While patent, copyright and trademark protection for our intellectual property is important, we believe our future success in highly dynamic markets is most dependent upon the technical competence and creative skills of our personnel. We attempt to protect our trade secrets and other proprietary information through confidentiality and other agreements with our customers, suppliers, employees and consultants and through other security measures. We also maintain exclusive and non-exclusive licenses with third parties for strategic technology used in certain products. However, these employees, consultants and third parties may breach these agreements, and we may not have adequate remedies for wrongdoing. In addition, the laws of certain territories in which we develop, manufacture or sell our products may not protect our intellectual property rights to the same extent as do the laws of the United States. In any event, the extent to which we can protect our trade secrets through the use of confidentiality agreements is limited, and our success will depend to a significant extent on our ability to innovate ahead of our competitors.

We might be involved in intellectual property disputes or other intellectual property infringement claims that may be costly to resolve, prevent us from selling or using the challenged technology and seriously harm our operating results and financial condition.

As is typical in the semiconductor equipment industry, from time to time we have received communications from other parties asserting the existence of patent rights, copyrights, trademark rights or other intellectual property rights which they believe cover certain of our products, processes, technologies or information. Litigation tends to be expensive and requires significant management time and attention and could have a negative effect on our results of operations or business if we lose or have to settle a case on significantly adverse terms. Our customary practice is to evaluate such infringement assertions and to consider whether to seek licenses where appropriate. However, we cannot ensure that licenses can be obtained or, if obtained, will be on acceptable terms or that costly litigation or other administrative proceedings will not occur. The inability to obtain necessary licenses or other rights on

reasonable terms, or the instigation of litigation or other administrative proceedings, could seriously harm our operating results and financial condition.

Table of Contents

We depend on key personnel to manage our business effectively, and if we are unable to attract, retain and motivate our key employees, our sales and product development could be harmed.

Our employees are vital to our success, and our key management, engineering and other employees are difficult to replace. We generally do not have employment contracts with our key employees. Further, we do not maintain key person life insurance on any of our employees. The expansion of high technology companies worldwide has increased demand and competition for qualified personnel. If we are unable to retain key personnel, or if we are not able to attract, assimilate or retain additional highly qualified employees to meet our needs in the future, our business and operations could be harmed.

Acquisitions are an important element of our strategy but, because of the uncertainties involved, we may not find suitable acquisition candidates and we may not be able to successfully integrate and manage acquired businesses.

In addition to our efforts to develop new technologies from internal sources, part of our growth strategy is to pursue acquisitions and acquire new technologies from external sources. As part of this effort, we may make acquisitions of, or significant investments in, businesses with complementary products, services and/or technologies. There can be no assurance that we will find suitable acquisition candidates or that acquisitions we complete will be successful. In addition, we may use equity to finance future acquisitions, which would increase our number of shares outstanding and be dilutive to current shareholders.

If we are unable to successfully integrate and manage acquired businesses or if acquired businesses perform poorly, then our business and financial results may suffer. It is possible that the businesses we have acquired, as well as businesses that we may acquire in the future, may perform worse than expected or prove to be more difficult to integrate and manage than expected. In addition, we may lose key employees of the acquired companies. As a result, risks associated with acquisition transactions may give rise to a material adverse effect on our business and financial results for a number of reasons, including:

we may have to devote unanticipated financial and management resources to acquired businesses;

the combination of businesses may cause the loss of key personnel or an interruption of, or loss of momentum in, the activities of our company and/or the acquired business;

we may not be able to realize expected operating efficiencies or product integration benefits from our acquisitions;

we may experience challenges in entering into new market segments for which we have not previously manufactured and sold products;

we may face difficulties in coordinating geographically separated organizations, systems and facilities;

the customers, suppliers, employees and others with whom the companies we acquire have business dealings may have a potentially adverse reaction to the acquisition;

we may have to write-off goodwill or other intangible assets; and

we may incur unforeseen obligations or liabilities in connection with acquisitions.

Compliance with federal securities laws, rules and regulations, as well as NASDAQ requirements, is becoming increasingly complex, and the significant attention and expense we must devote to those areas may have an adverse impact on our business.

Federal securities laws, rules and regulations, as well as NASDAQ rules and regulations, require companies to maintain extensive corporate governance measures, impose comprehensive reporting and disclosure requirements, set strict independence and financial expertise standards for audit and other committee members and impose civil and criminal penalties for companies and their chief executive officers, chief financial officers and directors for securities law violations. These laws, rules and regulations have increased

and will continue to increase the scope, complexity and cost of our corporate governance, reporting and disclosure practices, which could harm our results of operations and divert management's attention from business operations.

We are predominantly uninsured for losses and interruptions caused by terrorist acts and acts of war. If international political instability continues or increases, our business and results of operations could be harmed.

The threat of terrorism targeted at the regions of the world in which we do business increases the uncertainty in our markets. Any act of terrorism which affects the economy or the semiconductor industry could adversely affect our business. Increased international political instability, disruption in air transportation and further enhanced security measures as a result of terrorist attacks, and the continuing instability in the Middle East, may hinder our ability to do business and may increase our costs of operations. Such continuing instability could cause us to incur increased costs in transportation, make such transportation unreliable, increase our insurance costs, and cause international currency markets to fluctuate. This same instability could have the same effects on our suppliers and their ability to timely deliver their products. If this international political instability continues or increases, our business and results of operations could be harmed. We are predominantly uninsured for losses and interruptions caused by terrorist acts and acts of war.

Table of Contents

We self insure certain risks including earthquake risk. If one or more of the uninsured events occurs, we could suffer major financial loss.

We purchase insurance to help mitigate the economic impact of certain insurable risks; however, certain other risks are uninsurable or are insurable only at significant cost or cannot be mitigated with insurance. An earthquake could significantly disrupt our manufacturing operations, most of which are conducted in California. It could also significantly delay our research and engineering effort on new products, most of which is also conducted in California. We take steps to minimize the damage that would be caused by an earthquake, but there is no certainty that our efforts will prove successful in the event of an earthquake. We self insure earthquake risks because we believe this is a prudent financial decision based on our large cash reserves and the high cost and limited coverage available in the earthquake insurance market. Certain other risks are also self insured either based on a similar cost benefit analysis, or based on the unavailability of insurance. If one or more of the uninsured events occurs, we could suffer major financial loss.

A change in accounting standards or practices or a change in existing taxation rules or practices (or changes in interpretations of such standards, practices or rules) can have a significant effect on our reported results and may even affect reporting of transactions completed before the change is effective.

New accounting pronouncements and taxation rules and varying interpretations of accounting pronouncements and taxation rules have occurred and may occur in the future. Changes to (or revised interpretations of) existing tax or accounting rules or the questioning of current or past practices may adversely affect our reported financial results or the way we conduct our business.

For example, the adoption of Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment* which required us to measure all employee stock-based compensation awards using a fair value method beginning in fiscal year 2006 and record such expense in our consolidated financial statements, has had a material impact on our consolidated financial statements, as reported under accounting principles generally accepted in the United States of America.

A change in the effective tax rate can have a significant adverse impact on our business.

A number of factors may harm our future effective tax rates such as the jurisdictions in which profits are determined to be earned and taxed, the resolution of issues arising from tax audits with various tax authorities, changes in the valuation of our deferred tax assets and liabilities, adjustments to estimated taxes upon finalization of various tax returns, increases in expenses not deductible for tax purposes, including write-offs of acquired in-process research and development and impairment of goodwill, changes in available tax credits, changes in share-based compensation expense, changes in tax laws or the interpretation of such tax laws and changes in generally accepted accounting principles and the repatriation of non-U.S. earnings for which we have not previously provided for U.S. taxes. A change in the effective tax rate can adversely impact our results from operations.

We are exposed to various risks related to the regulatory environments where we perform our operations and conduct our business.

We are subject to various risks related to compliance with new, existing, different, inconsistent or even conflicting laws, rules and regulations enacted by legislative bodies and/or regulatory agencies in the countries in which we operate and with which we must comply, including environmental, safety, antitrust and export control regulations. For example, we are subject to environmental and safety regulations in connection with our global business operations, including regulations related to the development, manufacture and use of our products, recycling and disposal of materials used in our products or in producing our products, the operation of our facilities, and the use of our real property. Our failure or inability to comply with existing or future laws, rules or regulations, or changes to existing laws, rules or regulations, including changes that result in inconsistent or conflicting laws, rules or regulations, in the countries in which we operate could result in violations of contractual or regulatory obligations that may adversely affect our reported financial results or our ability to conduct our business.

We are exposed to foreign currency exchange rate fluctuations; although we hedge certain currency risks, we may still be adversely affected by changes in foreign currency exchange rates or declining economic conditions in these countries.

We have some exposure to fluctuations in foreign currency exchange rates, primarily the Euro and the Japanese Yen. We have international subsidiaries that operate and sell our products globally. We routinely hedge our exposures to certain foreign currencies with various financial institutions in an effort to minimize the impact of certain currency exchange rate fluctuations, but these hedges may be inadequate to protect us from currency exchange rate fluctuations. To the extent that these hedges are inadequate, or if there are significant currency exchange rate fluctuations in currencies for which we do not have hedges in place, our reported financial results or the way we conduct our business could be adversely affected. If a financial counter-party to our hedges experiences financial difficulties or is otherwise unable to honor the terms of the foreign currency hedge, we may experience material financial losses.

Table of Contents

There are risks associated with our outstanding indebtedness.

As of December 31, 2008, we had \$750 million aggregate principal amount of outstanding indebtedness represented by our senior notes that will mature in 2018, and we may incur additional indebtedness in the future. Our ability to pay interest and repay the principal for our indebtedness is dependent upon our ability to manage our business operations and the other risk factors discussed in this section. There can be no assurance that we will be able to manage any of these risks successfully. In addition, changes by any rating agency to our outlook or credit rating could negatively affect the value and liquidity of both our debt and equity securities.

In certain circumstances involving a change of control followed by a downgrade of the rating of our senior notes, we will be required to make an offer to repurchase the senior notes at a purchase price equal to 101% of the aggregate principal amount of the notes repurchased, plus accrued and unpaid interest. We cannot make any assurance that we will have sufficient financial resources at such time or will be able to arrange financing to pay the repurchase price of the senior notes. Our ability to repurchase the senior notes in such event may be limited by law, by the indenture associated with the senior notes, or by the terms of other agreements to which we may be party at such time. If we fail to repurchase the senior notes as required by the indenture, it would constitute an event of default under the indenture governing the senior notes which, in turn, may also constitute an event of default under other of our obligations.

We are exposed to fluctuations in the market values of our portfolio investments and in interest rates; impairment of our investments could harm our earnings.

Our investment portfolio consists of both corporate and government securities that have a maximum effective maturity of 10 years. The longer the duration of these securities, the more susceptible they are to changes in market interest rates and bond yields. As yields increase, those securities with a lower yield-at-cost show a mark-to-market unrealized loss. We have the ability to realize the full value of all these investments upon maturity. Unrealized losses are due to changes in interest rates and bond yields.

Auction rate securities backed by student loans which are collateralized, insured and guaranteed by the United States Federal Department of Education are also included in our investment portfolio. Due to the current illiquidity in the auction rate security market, the funds associated with these failed auctions may not be accessible until the issuer calls the security, a successful auction occurs, a buyer is found outside of the auction process, or the security matures. Although we believe our auction rate securities continue to represent sound investments due to the AAA/Aaa credit ratings of the underlying investments, we may be forced to sell some of our auction rate securities portfolio under illiquid market conditions, which could result in our recognizing a loss on such sales.

In August 2008, UBS AG entered into a settlement in principle with the SEC and various state regulatory agencies to restore liquidity to all clients holding auction rate securities. Per the settlement, UBS has agreed to offer certain clients the option to redeem all of their auction rate securities at par, no loss, from UBS between June 30, 2010 and June 30, 2012, and we formally accepted this offer and entered into a repurchase agreement with UBS on November 11, 2008. However, there is no assurance that UBS will have enough financial resources necessary to perform its obligations under the offer. If we elect to retain our auction rate securities in reliance upon that offer, with the intent of participating in the offer, but UBS is unable to satisfy its obligations under the offer at the applicable time, we may be required to sell the auction rate securities at that time at a significant loss, which could have an adverse impact upon our operating results and financial condition.

We rely upon certain critical information systems for our daily business operation. Our inability to use or access these information systems at critical points in time could unfavorably impact the timeliness and efficiency of our business operation.

Our global operations are linked by information systems, including telecommunications, the internet, our corporate intranet, network communications, email and various computer hardware and software applications. Despite our implementation of network security measures, our tools and servers are vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our computer systems and tools located at customer sites, or could be subject to system failures or malfunctions for other reasons. Any such event could have an adverse effect on our business, operating results and financial condition.

We may experience difficulties with our customer relationship management (CRM) system, enterprise resource planning (ERP) system or other IT systems. System failure or malfunctioning may result in a disruption of operations or the inability to process transactions, and this could adversely affect our financial results.

We may experience difficulties with our CRM system (recently implemented in fiscal year 2008) that could disrupt our ability to timely and accurately process and report key components of the results of our consolidated operations, our financial position and cash flows. System failure or malfunctioning could disrupt our ability to timely and accurately process and report key components of our results of operations, financial position and cash flows. Any disruptions or difficulties that may occur in connection with our ERP system or other systems could also adversely affect our ability to complete important business processes such as the evaluation of our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act of 2002. If we encounter unforeseen problems with regard to our CRM system, ERP system or other systems, our business could be adversely affected.

Table of Contents

Risks Related to the Restatement of Our Prior Financial Results

Our efforts to correct past material weaknesses in our internal controls may not have been sufficient, and we may discover additional material weaknesses in our internal controls.

As previously disclosed, the Company has undergone an investigation of the Company's historical stock option practices by the Special Committee of the Company's Board of Directors (for more information regarding the Special Committee investigation and its findings, please refer to Item 3, "Legal Proceedings" in our Annual Report on Form 10-K for the fiscal year ended June 30, 2007, which was filed with the SEC on August 20, 2007 (the "2007 Form 10-K"). As a result of that Special Committee investigation and our management's internal review of our historical stock option practices and related matters, we identified past material weaknesses in our internal controls and procedures (see Item 9A, "Controls and Procedures" in the 2007 Form 10-K). A material weakness is a control deficiency, or combination of them, that results in more than a remote likelihood that a material misstatement in our financial statements will not be prevented or detected. We believe that we have remedied the past material weaknesses in our internal controls and procedures, but there can be no assurance that our corrections were sufficient or fully effective, or that we will not discover additional material weaknesses in our internal controls and procedures in the future.

The Special Committee investigation of our historical stock option practices and the resulting restatements have been time consuming and expensive, and have had a material adverse effect on us.

The Special Committee investigation and the resulting restatement activities have required us to expend significant management time and incur significant accounting, legal and other expenses. In addition, we have established a Special Litigation Committee to oversee the litigation matters that have arisen out of the investigation and the restatements, and we cannot predict what additional actions may be required by these Committees. The period of time that will be necessary to resolve these matters is uncertain, and these matters could require significant additional attention and resources.

We have been named as a party to a number of shareholder derivative and class action lawsuits relating to our historical stock option practices, and we may be named in additional lawsuits in the future. This litigation has been and continues to be time consuming and expensive and could result in the payment of significant judgments and settlements, which could have a material adverse effect on our financial condition and results of operations.

In connection with our historical stock option practices and resulting restatements, a number of derivative actions were filed against certain of our current and former directors and officers purporting to assert claims on the Company's behalf. In addition, a number of securities class action complaints were filed against us and certain of our current and former directors and officers seeking damages related to our historical stock option practices and the resulting investigation, inquiries and restatements. There may be additional lawsuits of this nature filed in the future. We cannot predict the outcome of these lawsuits, nor can we predict the amount of time and expense that will be required to resolve these lawsuits. If these lawsuits become time consuming and expensive, or if there are unfavorable outcomes in any of these cases, there could be a material adverse effect on our business, financial condition and results of operations.

Our insurance coverage will not cover our total liabilities and expenses in these lawsuits, in part because we have a significant deductible on certain aspects of the coverage. In addition, subject to certain limitations, we are obligated to indemnify our current and former directors, officers and employees in connection with the investigation of our historical stock option practices and the related litigation and ongoing government inquiry. We currently hold insurance policies for the benefit of our directors and officers, although our insurance coverage may not be sufficient in some or all of these matters. Furthermore, the insurers may seek to deny or limit coverage in some or all of these matters, in which case we may have to self-fund all or a substantial portion of our indemnification obligations.

We are subject to the risks of additional government actions, shareholder lawsuits and other legal proceedings related to our historical stock option practices, the resulting restatements, and the remedial measures we have taken.

It is possible that there may be additional governmental actions, shareholder lawsuits and other legal proceedings brought against us in connection with our historical stock option practices. In addition, we may be sued or taken to arbitration by former officers and employees in connection with their stock options, employment terminations and other matters. These proceedings may require us to expend significant management time and incur significant accounting, legal and other expenses, and may divert attention and resources from the operation of our business. These expenditures and diversions, as well as the adverse resolution of any specific lawsuit, could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

Failure to maintain effective internal controls may cause us to delay filing our periodic reports with the SEC, affect our NASDAQ listing, and adversely affect our stock price.

The Securities and Exchange Commission, as directed by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring public companies to include a report of management on internal control over financial reporting in their annual reports on Form 10-K that contain an assessment by management of the effectiveness of the Company's internal control over financial reporting. In addition, our independent registered public accounting firm must report on the effectiveness of the Company's internal control over financial reporting. The Company has in prior periods identified certain material weaknesses in its internal control over financial reporting. However, we believe the Company remediated those past material weaknesses, and we have not identified any material weaknesses in our internal control over financial reporting for the fiscal year ended June 30, 2008. Although we review our internal control over financial reporting in order to ensure compliance with the Section 404 requirements, if our independent registered public accounting firm is not satisfied with our internal control over financial reporting or the level at which these controls are documented, designed, operated or reviewed, or if our independent registered public accounting firm interprets the requirements, rules and/or regulations differently from our interpretation, then they may issue a report that is qualified. This could result in an adverse reaction in the financial marketplace due to a loss of investor confidence in the reliability of our financial statements, which ultimately could negatively impact our stock price.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Following is a summary of stock repurchases for the three months ended December 31, 2008. ⁽¹⁾

Period	Total Number of Shares Purchased(4)	Average Price Paid per Share	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs(3)
October 1, 2008 to October 31, 2008(2)	1,450,000	\$ 26.66	9,831,000
November 1, 2008 to November 30, 2008		\$	9,831,000
December 1, 2008 to December 31, 2008		\$	9,831,000
Total	1,450,000	\$ 26.66	

- (1) In July 1997, the Board of Directors authorized KLA-Tencor to systematically repurchase up to 17.8 million shares of its common stock in the open market. This plan was put into place to reduce the dilution from KLA-Tencor's employee benefit and incentive plans such as the stock option and employee stock purchase plans, and to return excess cash to the Company's shareholders. The Board of Directors has authorized KLA-Tencor to repurchase additional shares of its common stock under the repurchase program in February 2005 (up to 10.0 million shares), February 2007 (up to 10.0 million shares), August 2007 (up to 10.0 million shares) and June 2008 (up to 15.0 million shares), in each case in addition to the originally authorized 17.8 million shares described in the first sentence of this footnote.
- (2) All shares were purchased pursuant to the publicly announced repurchase programs described in footnote 1 above.
- (3) The stock repurchase programs have no expiration date. Future repurchases of the Company's common stock under the Company's repurchase programs may be affected through various different repurchase transaction structures, including isolated open market transactions or systematic repurchase plans.
- (4) In October 2008, the Company suspended the stock repurchase program.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO VOTE OF SECURITY HOLDERS

The Company's Annual Meeting of Stockholders was held on November 13, 2008 at the Company's principal executive offices in Milpitas, California. Of the 170,627,492 shares of the Company's common stock outstanding as of September 30, 2008 (the record date), 154,174,848 shares, or 90%, were present or represented by proxy at the meeting. Two proposals were considered at the meeting.

Proposal One. The stockholders elected the Company's three Class I nominees to its Board of Directors to each serve for a three-year term, each until his successor is duly elected. The table below presents the results of the election.

Name	For	Withheld
Robert M. Calderoni	151,860,836	2,314,012
John T. Dickson	146,637,392	7,537,456
Kevin J. Kennedy	151,783,148	2,391,700

The Company's Class II directors (Robert P. Akins, Robert T. Bond, Kiran M. Patel and David C. Wang) and Class III directors (Edward W. Barnholt, Stephen P. Kaufman and Richard P. Wallace) were not subject to reelection at the annual meeting, and their respective terms of office as members of the Board of Directors continued after the meeting.
